## CACI Launches New Signal Detection Solution for Law Enforcement Professionals

***Will Debut STC Portable Spectrum Analyzer at NATIA Conference, Aug. 4-7 in San Diego***

ARLINGTON, Va.--(BUSINESS WIRE)-- CACI International Inc ([NYSE:CACI](http://NYSE:CACI)) announced today that it has launched the STC Portable Spectrum Analyzer, a real-time Radio Frequency (RF) signal detection and analysis solution that enhances situational awareness and security for members of law enforcement. This solution strengthens CACI's capabilities in its C4ISR (Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance) market area.

CACI will debut and demonstrate the STC Portable Spectrum Analyzer at the National Technical Investigators' Association (NATIA) Annual Training Conference and Technology Exhibition, which takes place in San Diego on August 4-7, 2014. This by-invitation-only event showcases over 190 manufacturers and distributors of state-of-the-art surveillance and investigative support products. CACI's demonstration will be available at booth #239.

The STC Portable Spectrum Analyzer combines hardware and software components into a portable, lightweight RF detection and monitoring system that enables users to quickly detect signals in a range of frequencies, enhancing their awareness of the surrounding environment and nearby activities. The software application interface allows users with minimal RF knowledge to operate it, while providing all the tools an experienced operator needs to accomplish the mission. The system is unique in that it can be remotely monitored via wireless or Ethernet controls. It is ideal for professionals in security services, law enforcement, spectrum management, and executive travel and support.

John Mengucci, CACI's Chief Operating Officer and President of U.S. Operations, said, "Our new STC Portable Spectrum Analyzer is an excellent demonstration of CACI's ability to fill a specific need in the marketplace with an innovative solution. This comprehensive and fully capable product represents a cost-effective option for our customers who may be working under budget constraints."

According to CACI President and Chief Executive Officer Ken Asbury, "CACI's launch of the STC Portable Spectrum Analyzer is part of our company growth strategy to expand into new markets and broaden our customer base. In addition to helping us reach more customers in state and local law enforcement, this product expands our presence within our C4ISR market area."

CACI provides information solutions and services in support of national security missions and government transformation for Intelligence, Defense, and Federal Civilian customers. A *Fortune* magazine World's Most Admired Company in the IT Services industry, CACI is a member of the Fortune 1000 Largest Companies, the Russell 2000 Index, and the S&P SmallCap 600 Index.
