

GOING FOR GOLD

Strong Portfolio of Highly Prospective District Scale Assets in Tier I Jurisdictions

Cautionary Statement

Cautionary Note Regarding Forward-Looking Information

This document contains certain forward-looking statements relating but not limited to the Company's expectations, intentions, plans and beliefs. Forward-looking information can often be identified by forward-looking words such as "anticipate", "believe", "expect", "goal", "plan", "intent", "estimate", "may" and "will" or similar words suggesting future outcomes or other expectations, beliefs, plans, objectives, assumptions, intentions or statements about future events or performance. Forward-looking information may include reserve and resource estimates, estimates of future production, unit costs, costs of capital projects and timing of commencement of operations, and is based on current expectations that involve a number of business risks and uncertainties. Factors that could cause actual results to differ materially from any forward-looking statement include, but are not limited to, failure to establish estimated resources and reserves, the grade and recovery of mined ore varying from estimates, capital and operating costs varying significantly from estimates, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, inflation, changes in exchange rates, fluctuations in commodity prices, delays in the development of projects and other factors. Forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from expected results.

Potential shareholders and prospective investors should be aware that these statements are subject to known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from those suggested by the forward-looking statements. Shareholders are cautioned not to place undue reliance on forward-looking information. By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections and various future events will not occur. GFG Resources Inc. undertakes no obligation to update publicly or otherwise revise any forward-looking information whether as a result of new information, future events or other such factors which affect this information, except as required by law.

Qualified Persons

Brian Skanderbeg, P.Geo. and M.Sc., serves as President and CEO of GFG, and is a "qualified person" within the meaning of National Instrument 43-101 – Standards of Disclosure for Mineral Projects. Mr. Skanderbeg has reviewed and approved the information contained in this document.

A North American GOLD Explorer

Experienced Management & Board

Highly credible, innovative & disciplined team with track record of success in exploration, development & production

District Scale Opportunities

Consolidated 3 district scale assets with brownfield & greenfield opportunities (+800 km²)

World-Class Timmins Gold District

Goldarm, Pen & Dore Gold Projects: located in the prolific gold district of Timmins, ON where +70M ozs of historic gold production

Tier I Mining Jurisdiction

Ontario is highly supportive of mining with significant infrastructure proximal to projects

Aggressive & Disruptive Exploration Strategy

Well-funded to aggressively advance projects with a focus to maximize capital in the ground & integrate technology & systems to drive discoveries

Our Mission

Operate to the highest standards for the benefit of all stakeholders

Be relentless in the pursuit of discovery

Maximize capital in the ground

Corporate Snapshot

Why Gold Exploration?

Quality Greenfield Opportunities are Rare

Exploration companies matter more than ever:

- Lack of <u>district scale</u> gold exploration assets in good jurisdictions
- Efficiency of discovery has significantly declined over the last decade → higher discovery cost
- Relevant discoveries are rare & will be acquired

Source: MinEx Consulting © Dec 2024

What is GFG doing differently to solve the problem?

- Consolidated districts in safe & productive jurisdictions
- Executed at the right time of the cycle to maximize shareholder value
- Using modern exploration techniques & technical innovation to drive discovery & build value
- Assembled a highly experienced & successful technical team

Surrounded by Majors

World Class Gold District & Infrastructure

Where is the best place to make the next BIG discovery?

- Control the **2nd largest land position** (+800 km²)
- Projects <u>strategically located along</u> main structural breaks
- Outstanding <u>infrastructure</u>, <u>skilled</u>
 <u>labour force & community</u> support
- Surrounded by mills <u>NOT needing</u>
 <u>high-grade to be economic</u> avg.
 camp grade < 4 g/t Au
- <u>Recent discoveries</u> are being made outside of the historic camp
- IAMGOLD 36,000 tpd mill at Cote Gold Project
- Projects <u>can be explored year-round</u> with great access

There is a NEED for FEED

Goldarm: High Discovery Potential

SFGRESOURCES

Regional Landscape

- Goldarm property consists of ~15,000 Ha
- Strategic location 40km from Timmins
- Proximal to significant infrastructure & numerous mines
- +30km of prospective strike length

- Geology like many Timmins deposits
- Located along a major crustal breaks Pipestone & North Pipestone Deformation Zones
- Opportunity to expand & discover gold systems Aljo
- High-grade Au occurrences at Carr Porphyry

Aljo Gold Project

Evolving gold system that spans 800 m along strike with multiple vein sets across four distinct zones down to ~430 m

- ALJ-24-012: <u>BEST DRILL HOLE IN GFG HISTORY!</u>
 - 23.08 g/t Au over 7.6 m incl. 215.00 g/t Au over 0.8 m
 - 13.94 g/t Au over 7.1 m incl. 15.92 g/t Au over 6.0 m
- ALJ-24-020:
 - 32.70 g/t Au over 0.5 m
 - 6.62 g/t Au over 11.2 m incl. 7.24 g/t Au over 10.2 m
- ALJ-24-018:
 - 1.74 g/t Au over 13.2 m incl. 24.20 g/t Au over 0.5 m
 - 4.68 g/t Au over 1.5 m
- ALJ-24-017:
 - 4.13 g/t Au over 5.2 m incl. 8.98 g/t Au over 2.2 m
 - 5.90 g/t Au over 1.4 m

Aljo Gold Target

A Growing Robust Gold System

Continuity is Key

Main Zone (Upper & Lower)

10

Montclerg Gold Project Cross-Section - MC Central

 Exploration initially focused above 200 m depth to understand the controls & scale of the Main & Upper Footwall zones

 With improved understanding targeting shifted to exploring the Lower Footwall Zone & associated parallel structures

Montclerg Gold Project

 Most recent drilling has returned broad high-grade gold mineralization in deepest hole drilled to date

 Drilling has demonstrated the potential for both bulk tonnage & UG high-grade mineralization

2.42 Au / 10.7 m

SGFGRESOURCES

1.20 Au / 40.5 m incl 1.79 Au / 18.0

3.69 Au / 7.4 m incl 9.23 Au / 2.15 m

6.05 Au / 2.0 m

3.28 Au / 2.4 m incl 6.14 Au / 1.0 m

Upper Footwall Zone

2021 2022

www.gfgresources.com TSX-V: GFG | OTCQB: GFGSF *See footnote for QA/QC disclosure p.26

A Step-Change At Depth

Geology Improving + Gold System Beyond 400 m

GFGRESOURCES

11

- Hole MTC-23-059, a 150 m step-out down dip of MTC-23-057 (10.21 g/t Au over 2.7 m), successfully intersected the FW zone with 4.79 g/t Au over 12.8 m
- Core demonstrated a meaningful change in the thickness of the Lower
 FW Zone from 2-5 m to well over 10 m
- Geology has changed with more intense alteration & veining
- Lower FW Zone is a viable target to significantly expand the gold system at depth
- Current focus is on metallurgical work

www.gfgresources.com *See footnote for QA/QC disclosure p.26

Greenfield Opportunities

GFGRESOURCES

Generating New Targets in Elephant Country

Goldarm Property

Wilkie-Walker VMS - Cu, Zn, Au Carr Porphyry - Cu, Au

Pen Property

Muskego - Au, Zn, Cu

• 8 targets

Chabot - Au

Slate Rock West - Au

Deloro - Ni

Dore Property

VMS Lens - Cu, Zn
Till Train - Au
East Block - Au, Cu

Goldarm: High Discovery Potential

GFGRESOURCES

Multiple Gold & Base Metal Targets

- Focus Areas:
 - Pipestone Fault across Wilkie, Walker, & Carr Townships
 - Aljo regional
- Work Programs:
 - Surface geochemistry
 - Geophysics (e.g., IP/mag)
 - Sonic base-of-till & top-of-bedrock drilling
 - Follow-up & first test drilling on priority targets
- District Validation: Recent results by Onyx (Argus North: 3.4 g/t Au over 69.6 m, 1.8 g/t Au over 91.0 m, 2.2 g/t Au over 52.2 m) highlights the potential for large, high-grade systems

www.gfgresources.com TSX-V: GFG | OTCQB: GFGSF 13

Pen Gold Project

Multiple Opportunities for Discovery

14

- A prime location for major orogenic gold deposits
- Multiple NEW targets generated from 1,200+ till samples, including 7 sonic drill transects
- Nickel sulphide & gold target compilation brought focus on Chabot & Chabot Extension in Deloro
- Pen hosts significant NiS potential in komatiite flows overlying Fe-formation in Deloro group rocks (SE block)
- Very strong gold targets generated from recent compilation of sonic, structural & geophysical data at Muskego, Chabot & Four Corners

Muskego Region

Gold & Base Metal Mineralization in First Test

- A prime location for major orogenic gold deposits
- Completed a 10-hole program in Q1
- Completed regional IP & Au in till sonic drill program to develop additional targets

TSX-V: GFG | OTCQB: GFGSF

*See footnote for QA/QC disclosure p.26

Chabot Target

Encouraging Results from Inaugural Drill Program

- 2 holes completed targeting up-dip extension of historical drill intercept of 18 g/t Au over 0.5 m
- PEN-25-100 yielded a new HW zone yielding 4.06 g/t Au over 4.2 m including 9.62 g/t Au over 1 m
- The zone consists of pyrite-rich replacement style mineralization with a rhyolite host rock with porphyry dykes.
- The zone hosts a significant gold-intill anomaly that stretches more than
 1.5 km
- NEW: High-grade grab samples up to 13 g/t Au
- Large number of historic pits & trenches in the area
- Multiple high-grade Ni occurrences & intercepts >1%

Doré Gold Project

Greenfield Opportunity Strategically Located

17

Doré Gold Project

Greenfield Opportunity Strategically Located

Dore Gold Project is located in between the Cote Gold Mine (+10M Au ounces) & the Borden Gold Mine (+5M Au ounces)

Exploration Programs

Growing Aljo & Targeting Significant Discoveries

Goldarm

- ~7,000 m of drilling at
 Aljo/WWCC focused on moving towards first phase of resource
 & generating new high-grade intercepts
- Targeting depth extensions down to 350 m at Aljo
- Preliminary metalurgical testing at Aljo
- Advanced geological modelling
- Advance & test greenfield targets
 - Aggressive generative work on Goldarm in H2
 - Argus-setting along Pipestone

Pen Gold

- ~2,500 m of drilling focused on Muskego
- Tested 5 greenfield target areas across Muskego

Expanded Regional Model by:

- IP Survey across Muskego
- Expanded sonic drilling lines west at Muskego

Expand Regional Gold Targets:

 Advance key target areas such as Chabot

Dore Gold

- Analyze till data to generate drill targets
- Advance best targets to phase 1 drilling
- Review strategic alternatives

Invest in GFG For.....

Exposure to *district scale assets* in *world* class jurisdictions

Executive Team

Biographies

Brian Skanderbeg, P.Geo. - President & CEO, Director

Mr. Skanderbeg was most recently President & CEO of Claude Resources Inc. which was acquired by SSR Mining for \$337 million. He previously worked for Goldcorp, Inco Ltd. & Helio Resources, holding positions in both exploration & operations. Mr. Skanderbeg is also a director of Wesdome Mines. He holds a B.Sc. from the University of Manitoba & an M.Sc. from Rhodes University, South Africa. He brings extensive experience in gold systems, operational management, cost and asset optimization & strategic analysis.

Rick Johnson, CPA. - CFO & Corporate Secretary

Mr. Johnson has over 25 years of experience in accounting, audit, tax & corporate governance. Most recently, Mr. Johnson was the CFO, Vice President of Finance and Corporate Secretary with Claude Resources Inc., which was acquired by SSR Mining in 2016. Mr. Johnson holds a Bachelor of Commerce degree from the University of Saskatchewan and is a member of CPA Canada.

Anders Carlson, P.Geo - Vice President, Exploration

Mr. Carlson is a seasoned mining professional with 17 years of experience in mineral exploration and economic geology. He holds an Applied M.Sc. in Mineral Exploration from Laurentian University & a B.Sc. (Hons) in Geology from the University of Manitoba. Throughout his career, he has held various positions with SSR Mining ("SSR"), Anglo American Plc., Cadillac Ventures Inc. & Wildcat Exploration Ltd. Over the past 12 years, he has held multiple titles in exploration & resource development with SSR, most recently serving as the Senior Manager of Exploration for Canada. During his tenure at SSR, he was part of the team responsible for adding more than 2 million ounces of high-grade gold to the resource base. He has also worked extensively with SSR's Business Development group, reviewing merger & acquisition targets that resulted in the merger with Alacer Gold Corp. in 2020 & the acquisition of Taiga Gold Corp. in 2022. In addition to his exploration expertise, he has worked with SSR's Global Growth team to strengthen and de-risk exploration pipelines, as well as unlock value at nearmine to greenfield opportunities globally. Furthermore, he has been an integral part of the community relations team in Canada, successfully developing Exploration and Capacity Sharing agreements with regional stakeholders.

Marc Lepage, CPIR. - Vice President, Business Development

Prior to joining GFG Resources, Mr. Lepage spent nearly eight years with Claude Resources Inc. as Manager, Investor Relations which was acquired by SSR Mining in 2016. Prior to his position with Claude, Mr. Lepage held marketing & business development positions in the consumer products & financial sectors. Mr. Lepage holds a Bachelor of Commerce degree from the University of Saskatchewan & a Certified Professional Investor Relations designation from the Richard Ivey School of Business.

Strategic Advisor

Carl Edmunds, P.Geo.

Carl has over 30 years' experience in the global mining industry and was most recently the Chief Geologist and Vice President of Exploration at SSR Mining for over 8 years, prior to its US\$5.0 billion merger with Alacer Gold in September 2020. Prior to SSR, he was Chief Geologist at AuRico Gold and its predecessor, Northgate Minerals, and held senior roles with Homestake Mining earlier in his career. Carl has significant experience in the Timmins Gold District and throughout the Abitibi of Ontario. Carl holds a Master of Science in Mineral Exploration from Queen's University and a Bachelor of Science (Geology) from the University of Edinburgh.

Board of Directors

Biographies

Patrick Downey, P.Eng. - Non-Executive Chair

Mr. Downey has over 25 years of international experience in the resource industry. Mr. Downey has significant executive & board experience which includes, Claude Resources, Victoria Gold, Dalradian Resources, Elgin, Viceroy, Aura & is currently the President & CEO of Orezone. He has also held numerous senior engineering positions at several large-scale gold mining operations. He holds a B.Sc. (Hon.) degree in Engineering from Queen's University in Belfast, Ireland.

Arnold Klassen, CPA - Director

Mr. Klassen is a CPA with over 35 years of experience in accounting, audit & tax, of which includes over 30 years of experience in the mining industry. Mr. Klassen is currently President of AKMJK Consulting Ltd. & prior to that was the Vice President of Finance for Dynatec Corp.. Mr. Klassen has significant board experience which includes, Lake Shore Gold, Claude Resources & Northern Superior Resources & Kirkland Lake Gold Ltd. He holds a degree in Commerce from the University of British Columbia & has obtained the Institute of Corporate Directors ICD.D designation.

Brian Booth, P.Geo. - Director

Mr. Booth brings more than 30 years of experience in mineral exploration throughout Canada, Europe & southeast Asia. He began his career as a geologist on the Casa Berardi gold discoveries in Quebec. He opened Inco's exploration office in Val d'Or & is credited with the discovery of the Douay West gold deposit in 1990. As Inco's Manager Exploration, Eastern North America, he conducted the preliminary assessment of the Voisey's Bay Ni-Cu-Co discovery & later was involved in the discovery of the Beutong copper porphyry in Indonesia. He also served as CEO, President & Director of Lake Shore Gold, where he completed the acquisition of the Bell Creek mine & mill & led the team that discovered the Timmins West, Thunder Creek & Bell Creek deep deposits. Most recently, he was CEO & Director of Pembrook Copper and the President & CEO of Element 29 Resources. Brian currently serves on the board of SSR Mining. He holds a B.Sc. in Geology from McGill University & is a member of the Professional Geoscientists of Ontario.

Lisa Riley – Director

Lisa has nearly 30 years of experience in global capital markets, finance, mining advisory and government relations. Currently, Lisa serves as an independent consultant to mining companies in addition to developing investment products to be launched in Argentina. Prior to consulting, Lisa held senior roles in equity research and institutional sales with Santander Investment, Lehman Brothers, RBC Capital Markets, and TD Securities. Lisa has served as a director to several mining companies and is currently on the board of Star Diamond Corp. Lisa holds a Bachelor of Arts (Honours) from the University of Toronto and is fluent in English, French and Spanish.

Brian Skanderbeg, P.Geo. - President & CEO, Director

Mr. Skanderbeg was most recently President & CEO of Claude Resources Inc. which was acquired by SSR Mining for \$337 million. He previously worked for Goldcorp, Inco Ltd. & Helio Resources, holding positions in both exploration & operations. Mr. Skanderbeg is also a director of Wesdome Mines. He holds a B.Sc. from the University of Manitoba & an M.Sc. from Rhodes University, South Africa. He brings extensive experience in gold systems, operational management, cost and asset optimization & strategic analysis.

Footnotes

1. Sampling and Quality Control: Till Samples were collected from hand-dug pits by experienced samplers at depths up to 1 meter in a grid pattern with nominal spacing of 500 by 1000m in areas of till cover. Geochemical samples (~2 kilograms) were sieved to minus 230 mesh and analyzed for gold and multi-element using an aqua regia digestion and ICP-ES/MS finish by Bureau Veritas Commodities Canada Ltd. in Vancouver in facilities accredited by the Standards Council of Canada. Gold grains were separated from bulk till samples (~10 kilograms) at IOS Services Geoscientifiques Inc. using their ArtPhot optical recognition methodology. Composition of separated gold grains were confirmed using a Scanning Electron Microscope. Comparison of geochemical results with accepted values for inserted certified reference materials confirms the accuracy of gold concentration results.

Till is a transported surficial media produced during active glaciation that is affected by subsequent surficial process that may affect the gold content and lead to further transport. As such the occurrence of a gold anomaly in till is not conclusive evidence of a mineral deposit existing within the Property.

Sampling protocol, quality control and assurance measures and geochemical results related to documented historic till, rock grab, and drill core samples have not been verified by the Qualified Person. However, the grades and locations of these samples have been cross referenced with available maps and reports and GFG believes them to be of reasonable accuracy.

- 2. Quality Analysis and Quality Control: The quality analysis and quality control measures utilized by Evolving Gold Corp. in respect of the historical drilling data disclosed above included the following: drill hole intervals were weighted averages with each assay interval weighted according to the core length. Rigorous quality assurance and quality control procedures were implemented including routine insertion of internal standard reference materials, certified reference materials, blank material and duplicate samples from both crush and pulp material. Gold assays were completed by SGS Canada Inc. in Toronto, using a 30-gram charge, fire assay, with an ICP finish. SGS Canada laboratory in Toronto is ISO accredited.
- 3. Gold intervals reported are based on a 0.20 g/t or 0.50 g/t Au cutoff. Weighted averaging has been used to calculate all reported intervals. True widths are estimated at 60-100% of drilled thicknesses.
