Discovery Breaks Ground on New Community Park in Iroquois Falls

Discovery Mining has officially broken ground on Discovery Park, a new community recreation space in Iroquois Falls made possible through the company's $1 million contribution to the town. The investment will support the development of a family-friendly park featuring a splash pad, modern playground, and new tennis and pickleball courts.

Designed to serve residents of all ages, Discovery Park will provide accessible and inclusive recreational amenities that promote active living, wellness, and community connection. The project is expected to become a central gathering place for local families, youth, seniors, and visitors while enhancing the quality of life in the community for years to come.

Town officials, representatives from Discovery Mining, community leaders, and residents gathered to celebrate the groundbreaking and the start of construction. The new park reflects a shared commitment to creating vibrant public spaces and investing in the long-term strength and attractiveness of Iroquois Falls as a place to live, work, and raise a family.

Discovery Mining Ltd. continues to invest in the communities where its employees live and work, supporting initiatives that deliver lasting social and economic benefits across northern Ontario.
