ABOUT DISCOVERY

Discovery is a growing precious metals company that is creating value for stakeholders through exposure to gold, silver and other critical minerals. The Company's silver exposure comes primarily from its first asset, the 100%-owned Cordero project, one of the world's largest undeveloped silver deposits, which is located close to infrastructure in a prolific mining belt in Chihuahua State, Mexico. In April 2025, Discovery acquired the Porcupine Complex, transforming the Company into a new Canadian gold producer with multiple operations, attractive growth projects and significant exploration upside in one of the world's most renowned gold camps in and near Timmins, Ontario. The acquisition of the Kidd Operations in June 2026 further increased Discovery's land position within the camp, provided valuable infrastructure that will support the Company's efforts to more than double annual gold production, and added critical minerals (copper, zinc and silver) to the Company's current production profile.

On Behalf of the Board of Directors,

Tony Makuch, P.Eng.
President, CEO & Chairman
