

## Volaris reports March 2021 traffic results: 93% of 2020 capacity with 87% load factor

Mexico City, Mexico. April 7, 2021 – Volaris\* (NYSE: **VLRS** and BMV: **VOLAR**), the ultra-low-cost airline serving Mexico, the United States and Central America, reports **March 2021** preliminary traffic results.

In the domestic Mexican market, demand continued to recover and we capitalized on opportunities to add capacity, ending the month with 4.6% more ASMs than in the prior year. International capacity decreased 35.4% in the month as a result of continuing US regulations on international flights and quarantine restrictions in Mexico preceding vaccination. As a result, March 2021 **total capacity** measured by ASMs (Available Seat Miles) was 92.8% compared to the same month of the prior year. **Demand** measured by RPMs (Revenue Passenger Miles) was 98% compared to the same month of the prior year. Volaris transported 1.5 million **passengers** in March 2021 and the booked **load factor** was 86.9%.

Volaris' President and Chief Executive Officer, Enrique Beltranena, commenting on the traffic results for March 2021, said: "Volaris' industry leading recovery has been driven by its unique ultra-low-cost structure that has positioned the Company as the leading airline in Mexico in terms of passengers carried and provides strong fundamentals for future growth. Our steady recovery process has been focused on rebuilding our core network, managing capacity by market where we expand as demand allows and to continue to exploit new opportunities as they appear. Our March 2021 figures and our capacity management are a testament to the domestic market opportunity and to Volaris' potential to expand its international network as the United States and Central American markets recover."

During the first quarter of **2021**, Volaris demonstrated flexibility focusing on capacity management in the face of a volatile demand environment. Volaris finished the quarter operating 88.3% of the ASMs flown in the first quarter of the prior year. For the second quarter of **2021**, the Company expects to operate approximately 110% of the **2019** second quarter capacity.

The following table summarizes Volaris traffic results for the month of March **2021**. For the first quarter of **2021** we are comparing versus **2020** figures. It should be noted that the COVID-19 pandemic did not start to impact demand in Mexico until the second half of March **2020**. Effective April **2021** we will start comparing versus **2019**.

	March 2021	March 2020	Variance	YTD March 2021	YTD March 2020	Variance
