

NEWS RELEASE

CenturyLink's 1 Gbps service is now available to 5,100 business locations in Idaho

2015-05-18

BOISE, Idaho, May 18, 2015 /PRNewswire/ -- **CenturyLink, Inc.** (NYSE: CTL) today announced the availability of 1 gigabit per second (Gbps) fiber speeds to approximately 5,100 select business locations in Idaho as part of a national fiber network upgrade that expanded availability of CenturyLink's gigabit services for businesses customers throughout the U.S. and into five additional states, including Idaho.

As part of CenturyLink's gigabit service launch in Idaho, speeds up to 1 Gbps are now available to select business locations in Boise and Meridian.

"We are pleased to be able to offer ultra-fast fiber broadband speeds up to one gigabit per second to more business customers in Boise and Meridian," said Jim Schmit, CenturyLink vice president of operations for Idaho, Montana and Wyoming. "While one gigabit and higher speeds have been available for some time to our larger business customers, this expansion brings greater availability and affordability to smaller and mid-sized businesses."

High-speed broadband connectivity makes it easier for businesses to work in the cloud, upload and download large multimedia files, stream video content and back-up data in real time. With symmetrical upload and download speeds of up to 1 Gbps, fiber service from CenturyLink outperforms the slower upload speeds available through basic business broadband providers, including many cable companies.

CenturyLink uses Fiber-To-The-Premises (FTTP) technology to provide speeds of up to 1 Gbps to businesses located near the company's fiber network backbone or in fiber-fed multi-tenant unit office buildings.

In addition to providing fiber connectivity, CenturyLink can manage a range of IT services for small and mid-sized business customers. CenturyLink's **Managed Office** is a complete IT and phone system solution that includes

managed voice, data, security, infrastructure and cloud-based business applications for a low monthly fee.

Managed services from CenturyLink are designed for businesses that want enterprise-class IT capabilities yet do not have enough in-house time or expertise to implement and maintain new technology. CenturyLink handles the day-to-day work of installing, managing and updating IT systems on behalf of businesses, which enables them to shift internal resources to more strategic projects.

Business customers can visit www.centurylink.com/idaho to learn more about CenturyLink's fiber-based services, including speeds up to 1 Gbps, and to determine if service is available in their location.

About CenturyLink
