NEWS RELEASE

BitGo Becomes the First Public, Federally Chartered Digital Asset Infrastructure Company

2026-01-29

Company's IPO and OCC national trust bank charter mark a defining moment for the maturation of the digital asset industry

NEW YORK--(BUSINESS WIRE)-- BitGo Holdings, Inc., (NYSE: BTGO) the digital asset infrastructure company, today announced that it has become the first publicly traded, federally chartered digital asset infrastructure company, following its initial public offering and related listing on the New York Stock Exchange on January 22, 2026 and the receipt of final approval from the Office of the Comptroller of the Currency (OCC) to operate as a national trust bank.

The dual milestones position BitGo at the highest level of regulatory standing in the digital asset industry and reflect a broader shift toward regulated, institution-grade infrastructure as digital assets continue to integrate into global financial markets.

BitGo's federal charter enables the company to provide regulated custody, wallet infrastructure, settlement, and related digital asset services to clients across all 50 U.S. states under a single national regulatory framework, while its public listing increases transparency, governance, and long-term accountability to customers, partners, and shareholders.

"Becoming a public company and a federally chartered national trust bank represents the culmination of more than a decade of building regulated, institutional-grade digital asset infrastructure," said Mike Belshe, Chief Executive Officer of BitGo. "This is not just a milestone for BitGo, it is a milestone for the industry. Digital assets are entering a new era where trust, regulation, and resilience are foundational, and BitGo is proud to help set that standard."

Since its founding in 2013, BitGo has focused on building core infrastructure for the digital asset economy, serving institutional clients including asset managers, exchanges, platforms, protocol foundations, and corporate treasuries. The company provides custody, wallet infrastructure, trading and financing services, settlement, stablecoins, and staking for the top brands and institutions in the world.

The combination of public-company governance and federal banking oversight further strengthens BitGo’s role as a long-term infrastructure provider for institutions seeking compliant and scalable access to digital assets.

“Traditional finance operates on regulated, neutral infrastructure that persists across market cycles,” added Mike Belshe. “Our mission has always been to build the equivalent for digital assets. These milestones reinforce that the industry is maturing and that regulated infrastructure is becoming the default, not the exception.”

BitGo plans to continue investing in product expansion, security, regulatory capabilities, and global growth to support the next phase of institutional and enterprise adoption.

About BitGo

BitGo is the digital asset infrastructure company delivering custody, wallets, staking, trading, financing, stablecoins, and settlement services from regulated cold storage. Since 2013, BitGo has focused on accelerating the transition of the financial system to a digital asset economy. BitGo maintains a global presence and multiple regulated entities, including BitGo Bank & Trust, National Association, a federally chartered digital asset bank. Today, BitGo serves thousands of institutions, including many of the industry's top brands, financial institutions, exchanges, and platforms, and millions of investors worldwide.

Forward Looking Statements

This press release contains forward-looking statements. Forward-looking statements include all statements that are not historical facts. These statements may include words such as “aim,” “anticipate,” “assume,” “believe,” “contemplate,” “continue,” “could,” “estimate,” “expect,” “forecast,” “foreseeable,” “guidance,” “intend,” “likely,” “may,” “objectives,” “outlook,” “plan,” “potentially,” “predict,” “project,” “seek,” “should,” “target,” “will,” “would,” or variations of these terms and similar expressions, or the negative of these terms or similar expressions. Such forward-looking statements are subject to various risks and uncertainties. Accordingly, there are or will be important factors that could cause actual outcomes or results to differ materially from those indicated in these statements. These factors include but are not limited to those described under “Risk Factors” in BitGo’s registration statement on Form S-1, as amended, relating to the initial public offering. These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in the registration statement. Although the Company believes that the expectations reflected in its forward-looking statements are reasonable, it cannot guarantee future results. We undertake no obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise, except as required by law.
