NEWS RELEASE

BitGo Launches Link, Giving Institutions One Borderless Network to Move Capital

2026-08-03

NEW YORK--(BUSINESS WIRE)-- BitGo Holdings, Inc. (NYSE: BTGO) ("BitGo" or the "Company"), the digital asset infrastructure company, today announced the launch of BitGo Link (“Link”), a centralized control layer connecting institutional clients' exchange accounts directly to the BitGo platform. Link gives trading and treasury teams a unified way to manage their capital across BitGo and a large network of leading exchanges.

Clients already rely on BitGo's Go Network to settle transactions and connect to liquidity within qualified custody. Link is the newest addition to that connectivity stack, extending the ability to transfer and control assets on connected exchanges from one place. Together, they form a single, borderless money movement layer, giving clients, for the first time, a clear view of where their capital sits, inside and outside of BitGo, and the ability to deploy it efficiently to support trading, treasury, and financing workflows.

BitGo Link provides a streamlined operational experience across venues with:

- **Portfolio-wide visibility:** real-time, granular visibility into total buying power across BitGo and non-BitGo accounts, including sub-accounts at connected exchanges.
- **Automated management tools:** one-click transfers from the BitGo platform, whether to rebalance across venues, meet margin or liquidity needs, or respond to market opportunities, with automatic reconciliation against exchange records and visibility into transaction status from initiation through settlement.
- **Secured movement:** every Link transfer routes through BitGo's Policy Engine, applying the same approval controls that protect BitGo wallets for institutions today.
- **Centralized governance:** admin roles and permissions extend to every connected exchange account, so a single admin can grant and manage access without repeating setup at each venue.

“Link makes BitGo the command center for institutional treasury and trading," said Mike Belshe, CEO and Co-founder of BitGo. "One network, no borders: governance travels with the capital, wherever it moves."

Link rounds out BitGo's full-stack approach to institutional digital assets: regulated qualified custody, secure capital and asset movement through the Go Network, and BitGo Prime's global liquidity layer of trading, financing, and collateral management services. Collectively, these bring custody, connectivity, and Prime services onto one trusted platform, giving clients a single way to effectively deploy the assets they hold.

Over time, BitGo expects to expand Link to additional exchanges and treasury workflows, extending this network even further.

About BitGo

BitGo (NYSE: BTGO) is the digital asset infrastructure company delivering custody, wallets, staking, trading, financing, stablecoins, and settlement services from regulated cold storage. Since 2013, BitGo has focused on accelerating the transition of the financial system to a digital asset economy. BitGo maintains a global presence and multiple regulated entities, including BitGo Bank & Trust, National Association, the first federally chartered digital asset trust bank owned by a publicly traded company. Today, BitGo serves thousands of institutions, including many of the industry's top brands, financial institutions, exchanges, and platforms, and millions of investors worldwide. Forward-Looking Statements

Certain statements in this press release constitute "forward-looking statements" within the meaning of the federal securities laws. Words such as "may," "might," "will," "should," "believe," "expect," "anticipate," "estimate," "continue," "predict," "forecast," "project," "plan," "intend" or similar expressions, or statements regarding intent, belief, or current expectations, are forward-looking statements. These forward-looking statements are subject to various risks and uncertainties, many of which are difficult to predict, that could cause actual results to differ materially from current expectations and assumptions from those set forth or implied by any forward-looking statements. Important factors that could cause actual results to differ materially from current expectations include, among others, the highly volatile nature of digital assets, technical issues in connection with the integration of supported digital assets and changes and upgrades to their underlying network, heightened scrutiny of our industry and operations, the theft, loss, or destruction of private keys required to access any digital assets held in custody for our own account or for our clients, errors in executing client transactions or managing our own trading activities, and the other factors discussed in the Company's Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission (the "SEC") on March 27, 2026, and its subsequent filings with the SEC, including subsequent periodic reports on Forms 10-Q and 8-K. Such forward-looking statements are based on facts and conditions as they exist at the time such statements are made and predictions as to future facts and conditions. While the Company believes these forward-looking statements are reasonable, readers of this press release are cautioned not to place undue reliance on any forward-looking statements. The information in this release is provided only as of the date of this release, and the Company does not undertake any obligation to update any forward-looking statement relating to matters discussed in this press release, except as may be required by applicable securities laws.
