

NEWS RELEASE

OKX and BitGo Expand Off-Exchange Settlement Infrastructure to Institutions Globally

2026-09-30

NEW YORK--(BUSINESS WIRE)-- BitGo Holdings, Inc. ("BitGo") (NYSE: BTGO) and OKX today announced the international expansion of their Off-Exchange Settlement integration, enabling eligible institutions outside the U.S. to access OKX's liquidity while supported assets remain in segregated, regulated custody with BitGo Singapore Pte. Ltd. ("BitGo Singapore").

The expansion builds on the relationship established earlier this year, when OKX joined BitGo's Go Network for U.S. institutions. Together, the integrations give eligible institutions in the U.S. and international markets a consistent model for separating custody, execution and settlement, while maintaining access to OKX's global liquidity and trading infrastructure.

"We believe institutions are increasingly looking to separate where they trade from where they hold their assets," said Mike Belshe, CEO and Co-founder of BitGo. "That separation is becoming an important part of how institutions manage counterparty risk and evaluate exchange relationships. Extending Go Network to OKX's international operations is intended to bring that model to more of our clients globally."

Traditionally, institutions accessing exchange liquidity have needed to transfer and maintain assets on trading venues before execution. Through Go Network Off-Exchange Settlement, eligible clients can access OKX's international liquidity while supported collateral remains in regulated, insured custody with BitGo Singapore until settlement, creating a clearer separation between custody, execution and settlement and supporting the more mature market structure institutions increasingly expect from digital asset trading.

"Institutional markets are becoming more open, interoperable and capital-efficient," said Star Xu, Founder and CEO of OKX. "Institutions should be able to choose where they custody assets and where they execute without sacrificing access to liquidity. Expanding our integration with BitGo internationally is another step toward connecting digital asset markets with the infrastructure and risk standards of global finance."

The expansion reflects the growing regulated infrastructure supporting institutional digital asset

markets globally. BitGo Singapore provides regulated custody under its Major Payment Institution license from MAS, while OKX operates through regulated entities in key international financial centers, including MAS-licensed OKX SG Pte. Ltd. in Singapore and VARA-licensed OKX Middle East Fintech FZE in Dubai.

Institutions are increasingly seeking the same market structure principles that underpin traditional financial markets: regulated, independent custody, access to liquidity across trading venues and efficient post-trade settlement. Connecting OKX to Go Network in both U.S. and international markets brings that architecture across jurisdictions and reflects a broader convergence between digital asset markets and institutional financial market infrastructure.

About BitGo

BitGo (NYSE: BTGO) is the digital asset infrastructure company delivering custody, wallets, staking, trading, financing, stablecoins, and settlement services from regulated cold storage. Since 2013, BitGo has focused on accelerating the transition of the financial system to a digital asset economy. BitGo maintains a global presence and multiple regulated entities, including BitGo Bank & Trust, National Association, the first federally chartered digital asset trust bank owned by a publicly traded company. Today, BitGo serves thousands of institutions, including many of the industry's top brands, financial institutions, exchanges, and platforms, and millions of investors worldwide. OKX is steadfastly committed to transparency and security and publishes Proof of Reserves reports on a monthly basis to ensure customer funds are always protected and available to people. To learn more about OKX, download the app or visit: okx.com.

Forward-Looking Statement

Certain statements in this press release constitute "forward-looking statements" within the meaning of the federal securities laws. Words such as "may," "might," "will," "should," "believe," "expect," "anticipate," "estimate," "continue," "predict," "forecast," "project," "plan," "intend" or similar expressions, or statements regarding intent, belief, or current expectations, are forward-looking statements. These forward-looking statements are subject to various risks and uncertainties, many of which are difficult to predict, that could cause actual results to differ materially from current expectations and assumptions from those set forth or implied by any forward-looking statements. Important factors that could cause actual results to differ materially from current expectations include, among others, the highly volatile nature of digital assets, technical issues in connection with the integration of supported digital assets and changes and upgrades to their underlying network, heightened scrutiny of our industry and operations, the theft, loss, or destruction of private keys required to access any digital assets held in custody for our own account or for our clients, errors in executing client transactions or managing our own trading activities, and the other factors discussed in BitGo's Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission (the "SEC")

on March 27, 2026, and its subsequent filings with the SEC, including subsequent periodic reports on Forms 10-Q and 8-K. Such forward-looking statements are based on facts and conditions as they exist at the time such statements are made and predictions as to future facts and conditions. While BitGo believes these forward-looking statements are reasonable, readers of this press release are cautioned not to place undue reliance on any forward-looking statements. The information in this release is provided only as of the date of this release, and BitGo does not undertake any obligation to update any forward-looking statement relating to matters discussed in this press release, except as may be required by applicable securities laws.
