

NEWS RELEASE

The Better Money Company Selects BitGo's Crypto-as-a-Service to Power Stablecoin Clearinghouse

2026-04-22

NEW YORK--(BUSINESS WIRE)-- BitGo Inc., the digital asset infrastructure company, and BitGo Bank & Trust, National Association, an OCC-regulated digital asset trust bank (together "BitGo"), both subsidiaries of BitGo Holdings, Inc. (NYSE: BTGO), today announced that [The Better Money Company \("TBMC"\)](#) has selected [BitGo's Crypto-as-a-Service \("CaaS"\)](#) to support its stablecoin clearinghouse. Through this partnership, BitGo will provide compliant issuer onboarding and qualified custody wallet infrastructure purpose-built to support TBMC's multi-issuer, multi-stablecoin clearing offering.

Stablecoins are becoming an increasingly important part of digital finance, enabling faster settlement and continuous transaction capability across global markets. As adoption grows and more issuers enter the market, fragmentation across stablecoins has created operational complexity for businesses that need to receive one stablecoin and settle in another.

TBMC is designed to make stablecoins easier to use for payment companies, fintechs, and banks by building a neutral clearing platform designed to address that challenge by enabling movement across stablecoins with greater predictability, operational efficiency, and interoperability. Rather than relying on fragmented liquidity pools or manual conversion processes, TBMC is building direct relationships with issuers and banking partners to support true stablecoin fungibility in a more efficient and structured manner.

BitGo's CaaS enables platforms to embed institutional-grade custody and wallet capabilities through API-driven infrastructure, eliminating the need to build digital asset custody and compliant onboarding of issuers in-house. For TMBC, this means compliant issuer onboarding powered by programmatic KYB, combined with embeddable qualified custody wallets built to meet institutional expectations for security, governance, and operational rigor. By building on BitGo's regulated backend, TBMC can focus on developing its platform while relying on BitGo for the regulated custody infrastructure as the foundation.

"We believe the stablecoin markets require infrastructure that can support compliance, security, and operational scale from day one," said Frank Wang, Managing Director of Fintech Sales at BitGo. "We are pleased to support The Better Money Company as it builds a platform for stablecoin interoperability

using BitGo's OCC-regulated Crypto-as-a-Service capabilities."

"Selecting the right custody partner is a critical decision for any business operating in digital assets. For us, it came down to three essential criteria: security, licensing, and technology. BitGo leads on all three. As an OCC-chartered trust bank with an outstanding security track record and a highly advanced technology solution. We look forward to building better money together." - Sam Broner, Founder & CEO at The Better Money Company

As stablecoins continue to gain traction across payments, treasury operations and digital commerce, the infrastructure connecting them is becoming increasingly important. BitGo and TBMC are working together to help build a more interoperable foundation for the stablecoin economy.

About BitGo

BitGo (NYSE: BTGO) is the digital asset infrastructure company delivering custody, wallets, staking, trading, financing, stablecoins, and settlement services from regulated cold storage. Since 2013, BitGo has focused on accelerating the transition of the financial system to a digital asset economy. BitGo maintains a global presence and multiple regulated entities, including BitGo Bank & Trust, National Association, the first federally chartered digital asset trust bank owned by a publicly traded company. Today, BitGo serves thousands of institutions, including many of the industry's top brands, financial institutions, exchanges, and platforms, and millions of investors worldwide. About The Better Money Company

Stablecoins are better money, yet key structural challenges stand between where we are today and the next wave of adoption. The Better Money Company is here to solve them. We're building the infrastructure for the next era of money, starting with a stablecoin clearinghouse that enables swapping and redemption at par, powered by direct issuance and settlement capability. From there, we'll expand into products and tools that help partners unleash the full potential of reliable stablecoins. We believe every business should be able to own its payments stack, operate more efficiently, and build superior products using better money, and we're making that possible. Forward-Looking Statements

Certain statements in this press release constitute "forward-looking statements" within the meaning of the federal securities laws. Words such as "may," "might," "will," "should," "believe," "expect," "anticipate," "estimate," "continue," "predict," "forecast," "project," "plan," "intend" or similar expressions, or statements regarding intent, belief, or current expectations, are forward-looking statements. These forward-looking statements are subject to various risks and uncertainties, many of which are difficult to predict, that could cause actual results to differ materially from current expectations and assumptions from those set forth or implied by any forward-looking statements. Important factors that could cause actual results to differ materially from current expectations include, among others, the highly volatile nature of digital assets, technical issues in connection with the integration of supported digital assets and changes and upgrades to their underlying network, heightened scrutiny of our industry and operations, the theft, loss, or destruction of private keys required to access any digital assets held in custody for our own account or for our clients, errors in executing client transactions or managing our own trading activities, and the other factors discussed in the Company's Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission (the "SEC") on March 27, 2026, and its subsequent filings with the SEC, including subsequent periodic reports on Forms 10-Q and 8-K. Such forward-looking statements are based on facts and conditions as they exist at the time such statements are made and predictions as to future facts and conditions. While the Company believes these forward-looking statements are reasonable, readers of this press release are cautioned not to place undue reliance on any forward-looking statements. The information

in this release is provided only as of the date of this release, and the Company does not undertake any obligation to update any forward-looking statement relating to matters discussed in this press release, except as may be required by applicable securities laws.
