# ACUSHNET HOLDINGS CORP. Reconciliation of GAAP to Non-GAAP Measures

(Unaudited)

#### **Use of Non-GAAP Financial Measures**

The Company reports its financial results in accordance with generally accepted accounting principles in the United States ("GAAP"). However, this release includes the non-GAAP financial measures of net sales in constant currency, Adjusted EBITDA and Adjusted EBITDA margin. These non-GAAP financial measures are not measures of financial performance in accordance with GAAP and may exclude items that are significant to understanding and assessing the Company's financial results. Therefore, these measures should not be considered in isolation or as an alternative to net sales, net income or other measures of profitability or performance under GAAP. You should be aware that the Company's presentation of these measures may not be comparable to similarly-titled measures used by other companies.

We use net sales on a constant currency basis to evaluate the sales performance of our business in period over period comparisons and for forecasting our business going forward. Constant currency information allows us to estimate what our sales performance would have been without changes in foreign currency exchange rates. This information is calculated by taking the current period local currency sales and translating them into U.S. dollars based upon the foreign currency exchange rates for the applicable comparable prior period. This constant currency information should not be considered in isolation or as a substitute for any measure derived in accordance with GAAP. Our presentation of constant currency information may not be consistent with the manner in which similar measures are derived or used by other companies.

Adjusted EBITDA represents net income attributable to Acushnet Holdings Corp. adjusted for interest expense, net, income tax expense (benefit), depreciation and amortization; and other items defined in the agreement, including: share-based compensation expense; restructuring and transformation costs; certain transaction fees; extraordinary, unusual or non-recurring losses or charges; indemnification expense (income); certain pension settlement costs; certain other non-cash (gains) losses, net and the net income relating to noncontrolling interests. We define Adjusted EBITDA in a manner consistent with the term "Consolidated EBITDA" as it is defined in our credit agreement.

We present Adjusted EBITDA as a supplemental measure because it excludes the impact of certain items that we do not consider indicative of our ongoing operating performance. Management uses Adjusted EBITDA to evaluate the effectiveness of our business strategies, assess our consolidated operating performance and make decisions regarding pricing of our products, go to market execution and costs to incur across our business.

We believe Adjusted EBITDA provides useful information to investors regarding our consolidated operating performance. By presenting Adjusted EBITDA, we provide a basis for comparison of our business operations between different periods by excluding items that we do not believe are indicative of our core operating performance.

Adjusted EBITDA is not a measurement of financial performance under GAAP. It should not be considered an alternative to net income attributable to Acushnet Holdings Corp. as a measure of our operating performance or any other measure of performance derived in accordance with GAAP. In addition, Adjusted EBITDA should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items, or affected by similar non-recurring items. Adjusted EBITDA has limitations as an analytical

tool, and you should not consider such measure either in isolation or as a substitute for analyzing our results as reported under GAAP. Our definition and calculation of Adjusted EBITDA is not necessarily comparable to other similarly titled measures used by other companies due to different methods of calculation.

We also use Adjusted EBITDA margin on a consolidated basis, which measures our Adjusted EBITDA as a percentage of net sales, because our management uses it to evaluate the effectiveness of our business strategies, assess our consolidated operating performance and make decisions regarding pricing of our products, go to market execution and costs to incur across our business. We present Adjusted EBITDA margin as a supplemental measure of our operating performance because it excludes the impact of certain items that we do not consider indicative of our ongoing operating performance. Adjusted EBITDA margin is not a measurement of financial performance under GAAP. It should not be considered an alternative to any measure of performance derived in accordance with GAAP.
