Reimagine Collaboration & Security

Jeetu Patel

EVP and General Manager,
Security & Collaboration

Forward-Looking Statements

This presentation contains projections and other forward-looking statements regarding future events or the future financial performance of Cisco, including future operating results and Cisco's forward-looking targets. These projections and statements are only predictions. Actual events or results may differ materially from those in the projections or other forward-looking statements. In addition, Cisco's forward-looking targets do not represent projections or guidance for a particular period, but rather long-term financial targets management utilizes in managing the business and actual results for a particular period may differ materially. Please see Cisco's filings with the SEC, including its most recent reports on Form 10-K and Form 10-Q, for a discussion of important risk factors that could cause actual events or results to differ materially from those in the projections or other forward-looking statements.

GAAP Reconciliation

During this presentation references to financial measures of Cisco will include references to non-GAAP financial measures. Cisco provides a reconciliation between GAAP and non-GAAP financial information on the Cisco Investor Relations website <https://investor.cisco.com/financial-information/financial-results/default.aspx>

Non-GAAP measures for future periods would not include, when applicable, share-based compensation expense, amortization of acquisition-related intangible assets, acquisition related/divestiture costs, significant asset impairments and restructurings, significant litigation settlements and other contingencies, Russia-Ukraine war costs, gains and losses on equity investments, the income tax effects of the foregoing, significant tax matters, and other items that Cisco may exclude from time to time in the future.

Connecting and protecting people and workplaces

Cisco Collaboration Business

Our opportunity

Massive TAM

\$90B

Source: : IDC, Gartner, Dell'Oro, Synergy, 451 Research, 650 Group, Signal AI, LightCounting & Internal Cisco Estimates. These TAMs are based on limited information currently available to Cisco, which is subject to change. Actual results may differ materially due to a variety of factors listed in Cisco SEC filings, including business and economic conditions.

Market trends

- Massive collaboration market across Conferencing, Calling, Devices, Contact Center.
- AI has created a CEO-level imperative to transform Customer Experience.
- Hybrid Work and AI peripherals creating a large device refresh opportunity as enterprises mandate "return to office."

Webex Platform

Reimagining employee and customer experiences

Reimagine workspaces

Reimagine work

Reimagine customer experience

Room Bar

Room Bar Pro

Room Kit EQ

Room Kit Pro

Multiple demand drivers for the collaboration portfolio

Conference room and workspace upgrades

Completed refresh of portfolio with next-generation rooms, phones, and headsets

One-click interoperability with Microsoft, Google, Zoom

Everyone can benefit from device-level AI innovation regardless of what meeting solution they use

Broad hybrid work transformations

Enhanced office, branch, and home experiences by integrating across Cisco portfolio

Video device unit sales volume has gone from negative growth in FY23 to positive double-digit growth in FY24

AI-powered self-learning Contact Center

Proactive communications

Self-service

Human interaction

Webex Platform

The collaboration portfolio is a key part of Cisco's strategy to **connect and protect people and workplaces in the AI era.**

Reimagining security in the AI era

Cisco Security Business

Our opportunity

Massive TAM

\$118B

Source: : IDC, Gartner, Dell'Oro, Synergy, 451 Research, 650 Group, Cignal AI, LightCounting & Internal Cisco Estimates. These TAMs are based on limited information currently available to Cisco, which is subject to change. Actual results may differ materially due to a variety of factors listed in Cisco SEC filings, including business and economic conditions.

Market trends

- Attacks are getting more sophisticated, and security is too complex.
- The move to hyper-distributed architectures is accelerating. Traditional security approaches will not work.
- Preventing lateral movement is critical in a world where we must assume an attacker is already in.

Our differentiated strategy

Platform shift

Move from point solutions to a platform with deep hooks into infrastructure..

Hyper-distributed security

Security infused into the fabric of the network with a completely reimagined approach.

Extend leadership in SOC

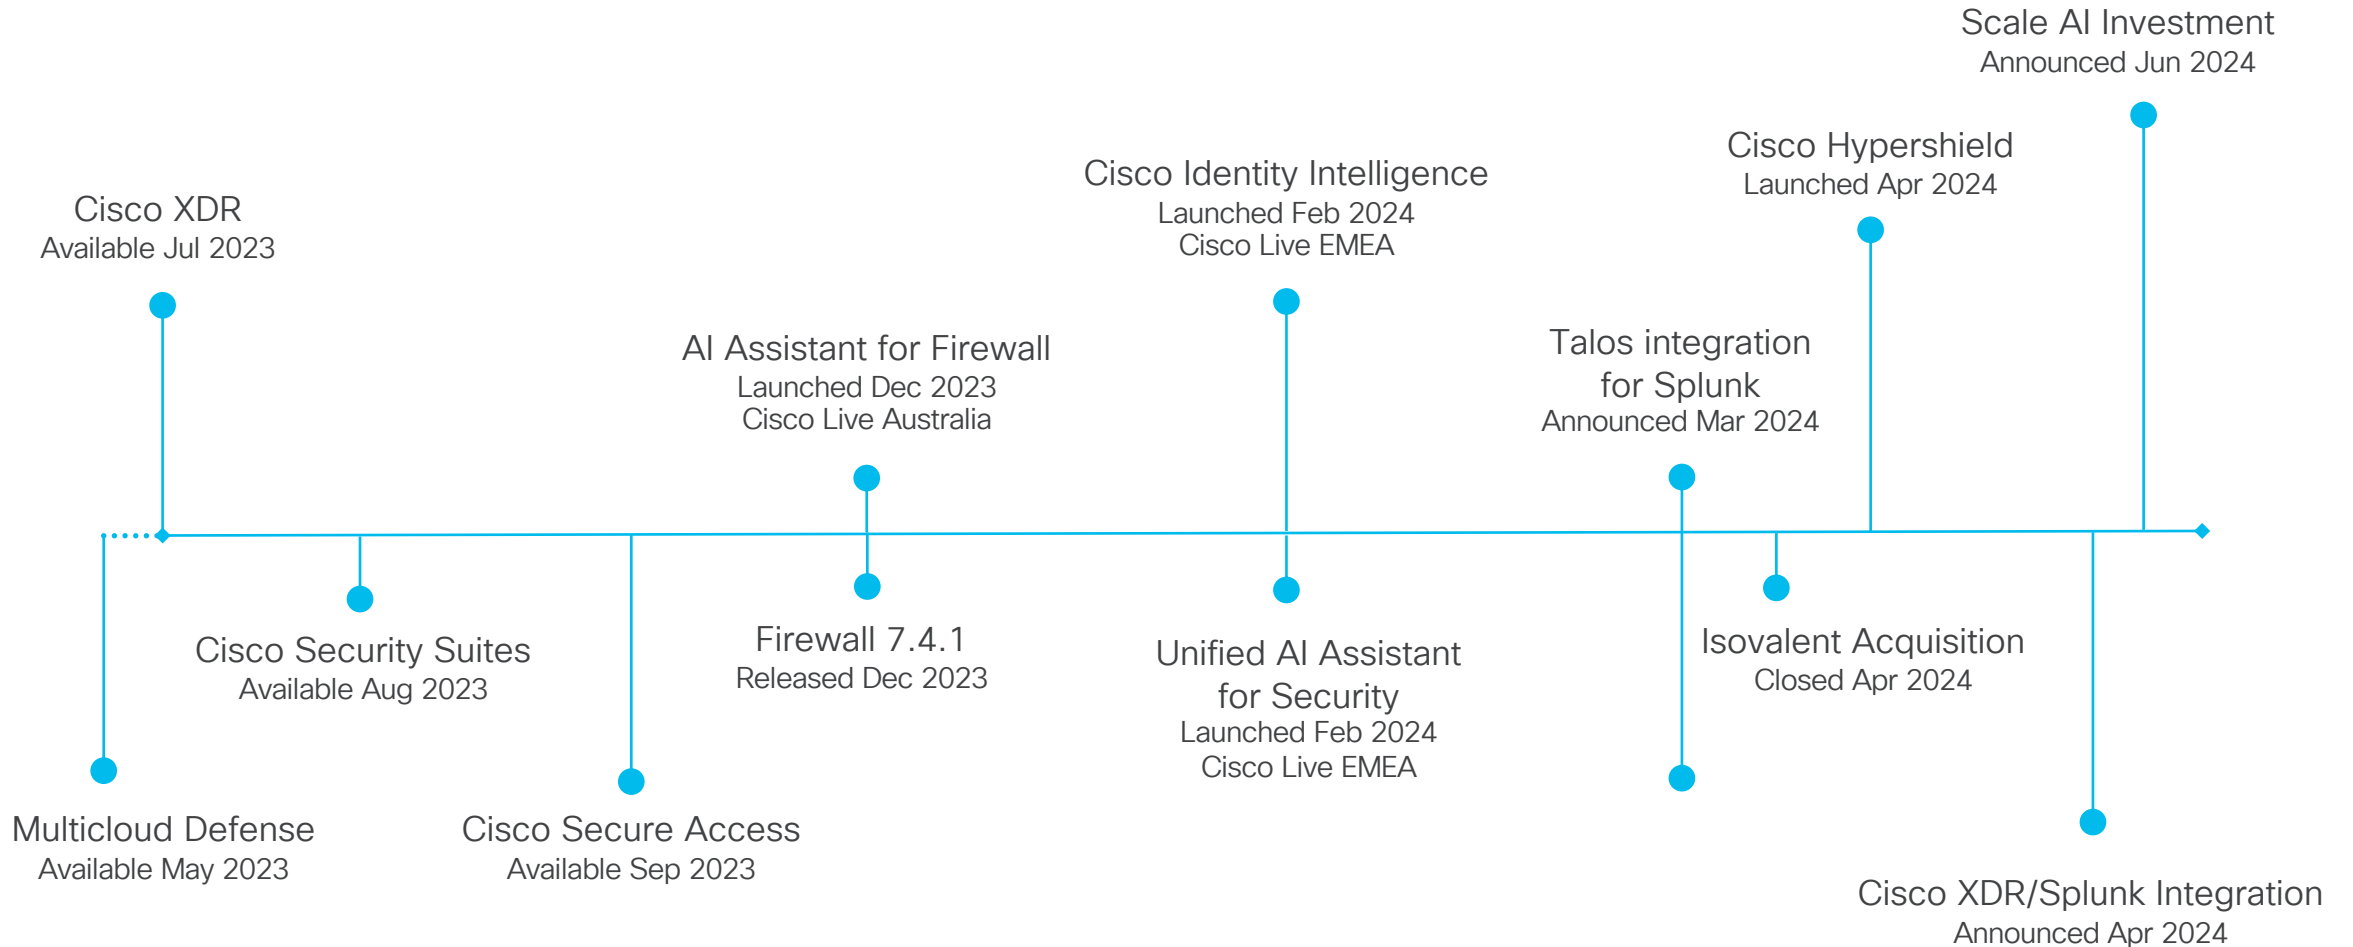

Leverage Cisco + Splunk's depth and breadth of telemetry to prevent, detect, and respond to sophisticated attacks.

Platform shift

Highly accelerated innovation

Delivering on the **Cisco Security Cloud** vision

Addition of Splunk establishes Cisco as a leader in the SOC

10th consecutive time as a Leader

← Firewall →

Anchor products drive suite sales

| Suites | Lead Product | Differentiation |
|-------------------|----------------------------|--|
| User Protection | Cisco Secure Access | <ul style="list-style-type: none">• One simple, secure experience for users to access private, public, and SaaS applications• Leverages Cisco's massive VPN install base as an upsell opportunity |
| Breach Protection | Cisco XDR | <ul style="list-style-type: none">• Real-time threat detection and response without complexity• Leverages Cisco's extensive email, web, endpoint, and network telemetry |
| Cloud Protection | Cisco Hypershield | <ul style="list-style-type: none">• Native AI capabilities enforce security everywhere an application or device exists• Leverages Cisco networking presence and leapfrogs competitive market offerings |
| Firewall | | <ul style="list-style-type: none">• Complete family of products at different price points for data center, campus, branch, etc.• Important security enforcement point creates upsell opportunity into security suites |

Each anchor product represents a **land-and-expand opportunity** for the rest of the Suite and security portfolio

Winning in Network Security

Secure Firewall 1200 Series

- Up to 3x the performance of comparable firewalls
- Price/performance leader for branch firewalls

New products leading to new wins and changing market perception

XDR

Large U.S. municipal healthcare provider

Integrating multiple vendors for correlated detections.

Large U.S. public university

Correlated telemetry of curated third-party integrations.

UK's leading value retailer

Executing a 5-year security transformation with XDR.

Firewall

Global multimedia conglomerate

Strategic need for a more cohesive, innovative, and integrated security platform to enhance resiliency.

India-based multinational software company

Focused on insights, ease of use and scalability. Met compliance requirements for deep packet inspection at scale.

Secure Access

Large global clinical laboratory network

Leveraging existing infrastructure and investments. Integration with Cisco Identity Services Engine to enable robust segmentation.

Major U.S. adhesives manufacturer

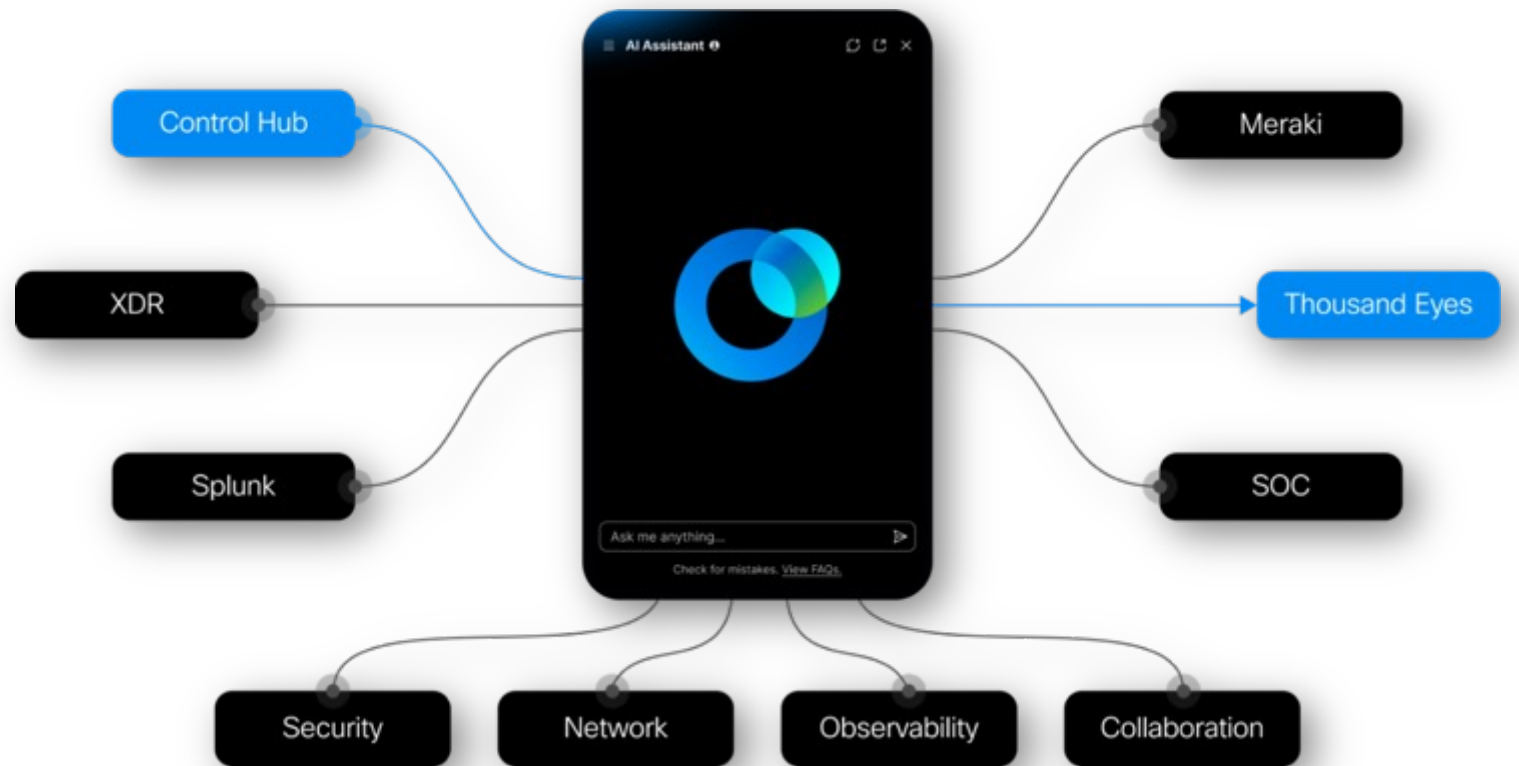

Delivering platform value by consolidating the endpoint experience with robust integrations with Cisco XDR.

Top 10 global software company

Differentiated and expanded use cases combining Secure Access with Multicloud Defense.

Cisco AI Assistant

Skills enable differentiated cross-domain insight

Hyper- distributed security

An increasingly hyper-distributed
and encrypted world requires a
reimagined security architecture

Architecture supports multiple enforcement points

- In the cloud with eBPF agents
- In infrastructure with DPUs in switches and servers

Cisco Hypershield **reimagines security**

Segmentation is hard

Autonomous segmentation

Patching is hard

Distributed exploit protection

Updating is hard

Self-qualifying upgrades

Extend leadership in SOC

Security is a **data problem**.

Cisco combined with Splunk can **see, correlate, and analyze more** security telemetry and threat intelligence than anyone.

The path to a more efficient and responsive **Threat Detection, Investigation, and Response** capability

Cisco + Splunk

XDR:

Foundational detection and response

SIEM:

Broadened insights and investigation

SOAR:

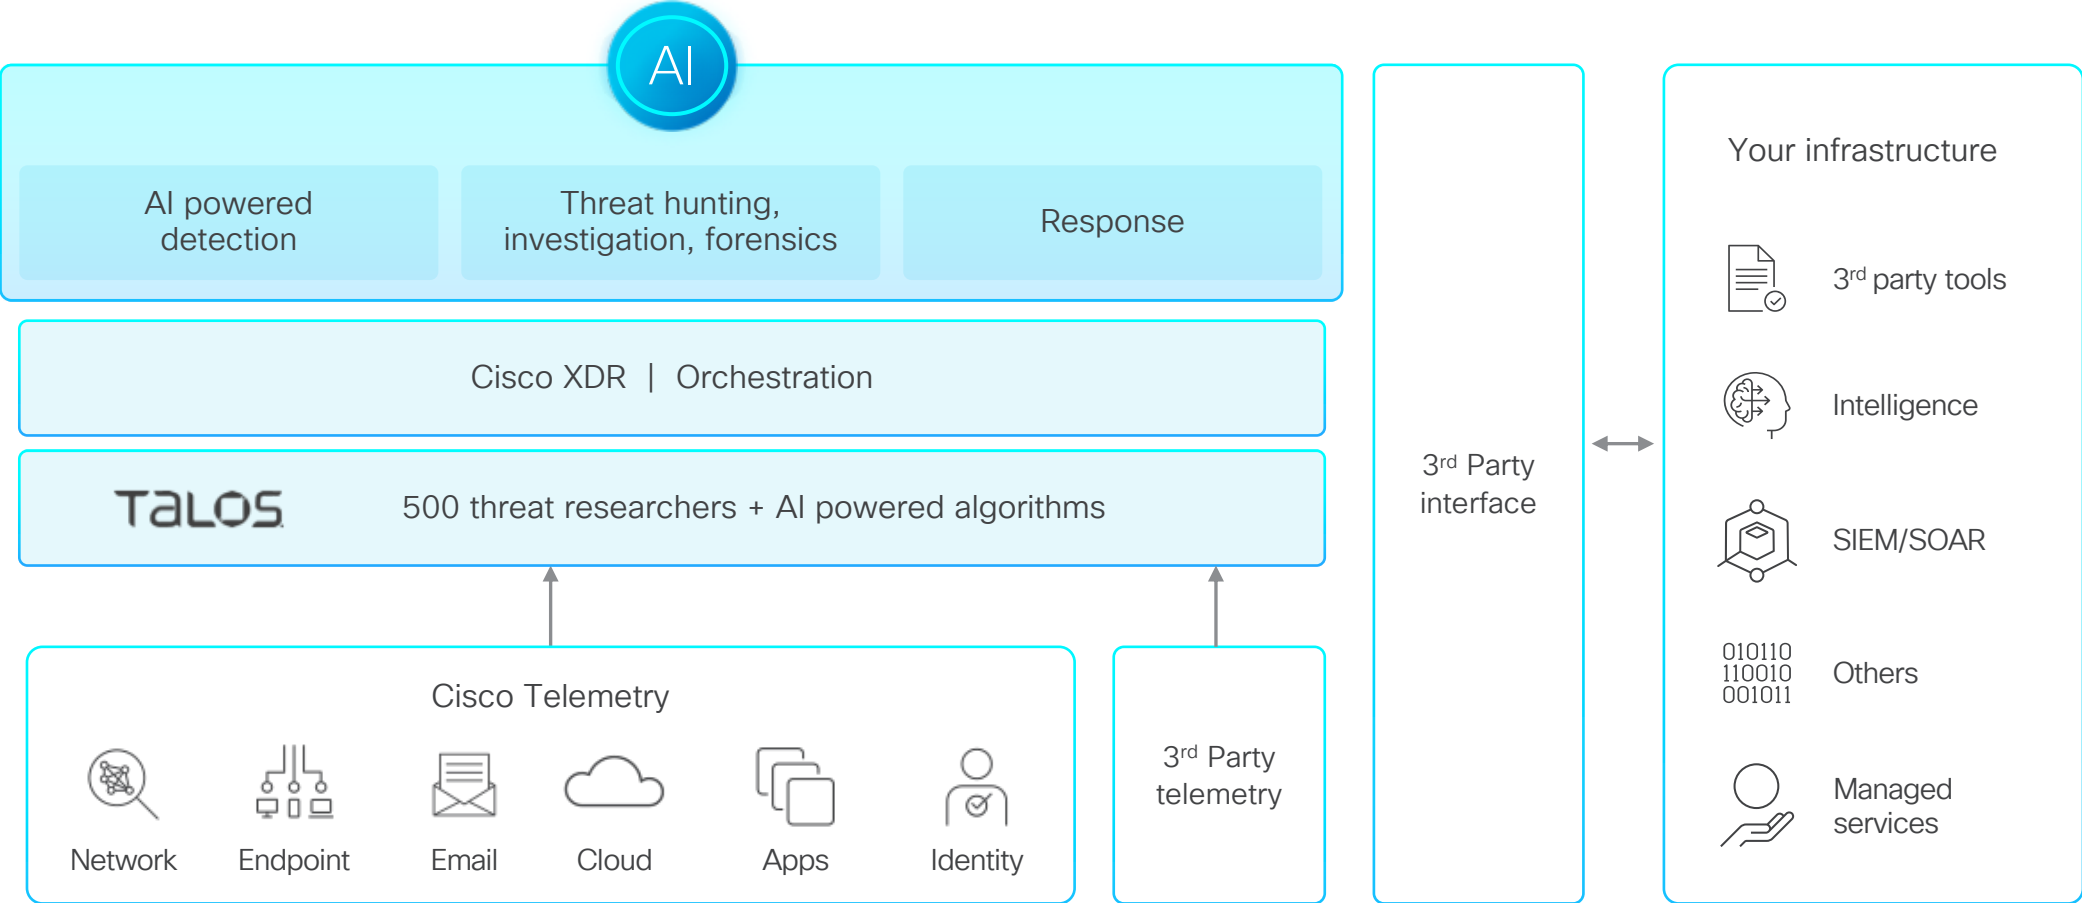

Playbook automation & orchestration

Unified TDIR:
Maximize SOC efficiency

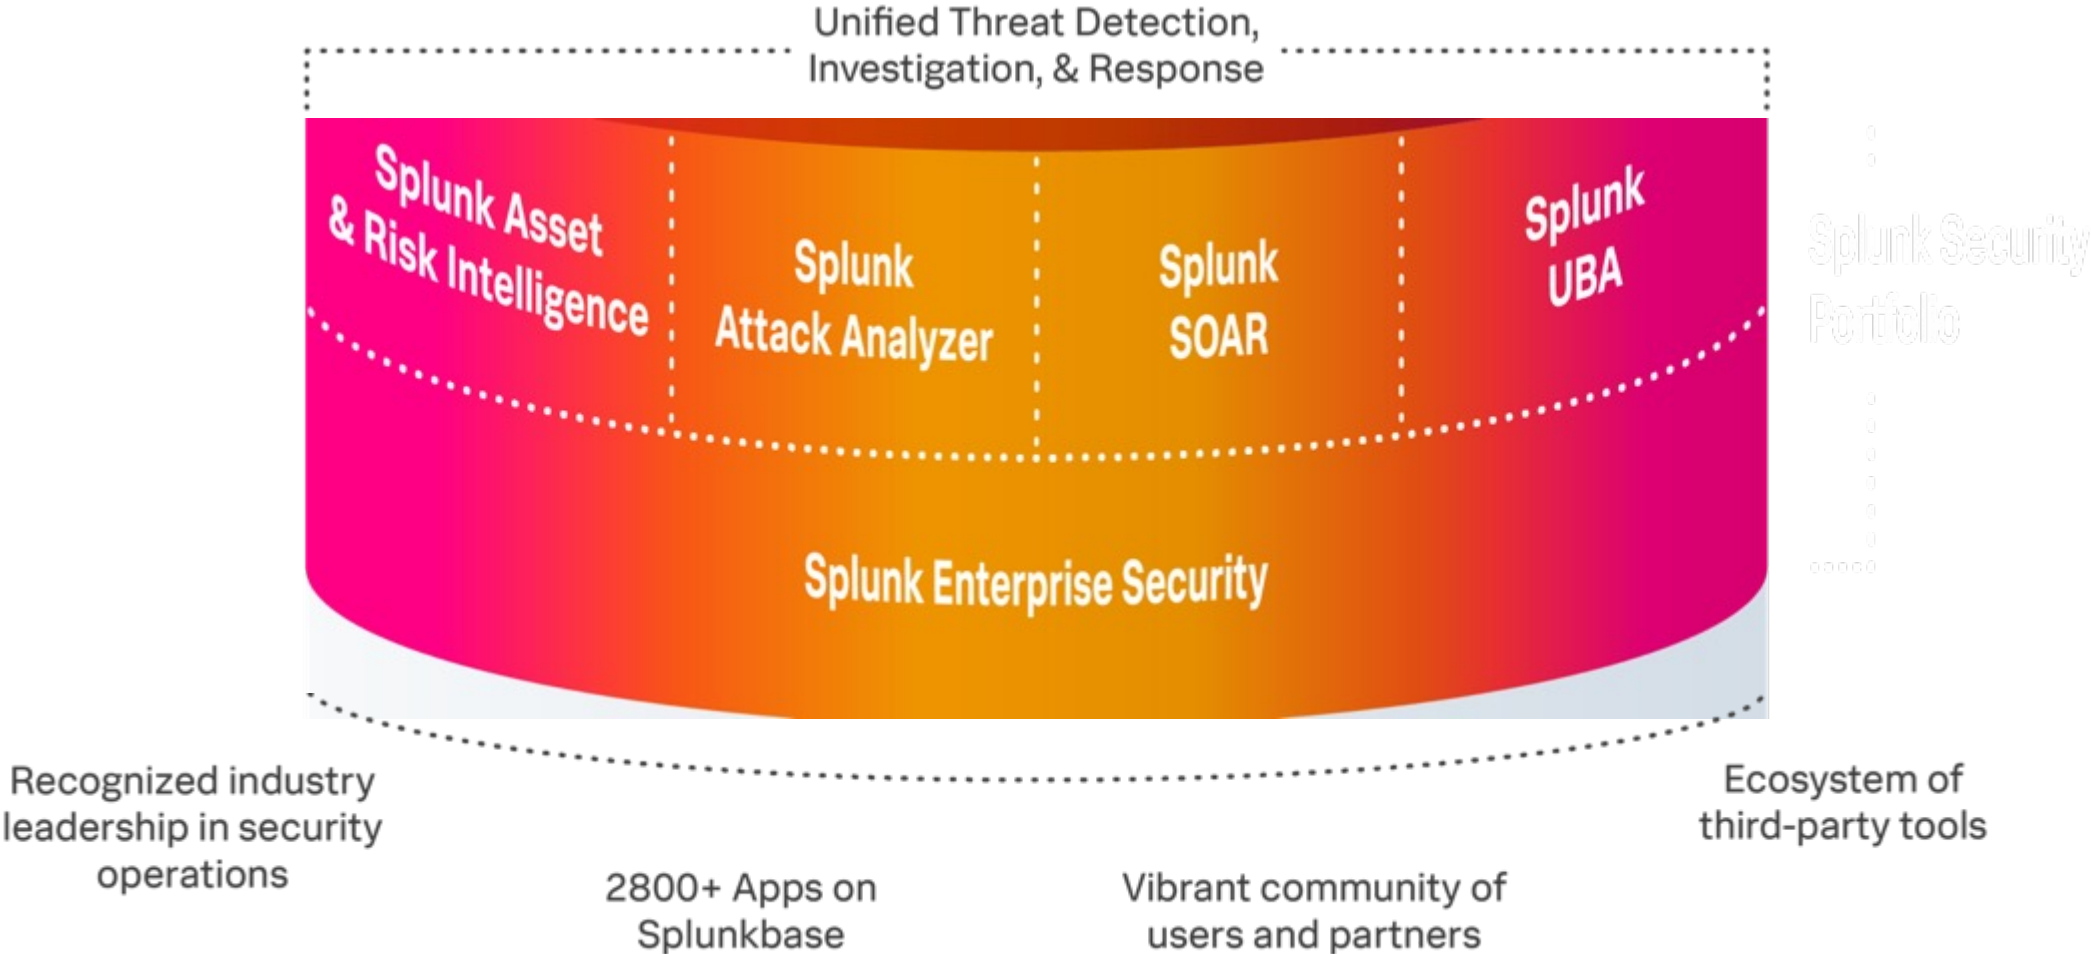

AI Guided

We can meet customers **wherever**
they are on this journey

Customers can start with XDR

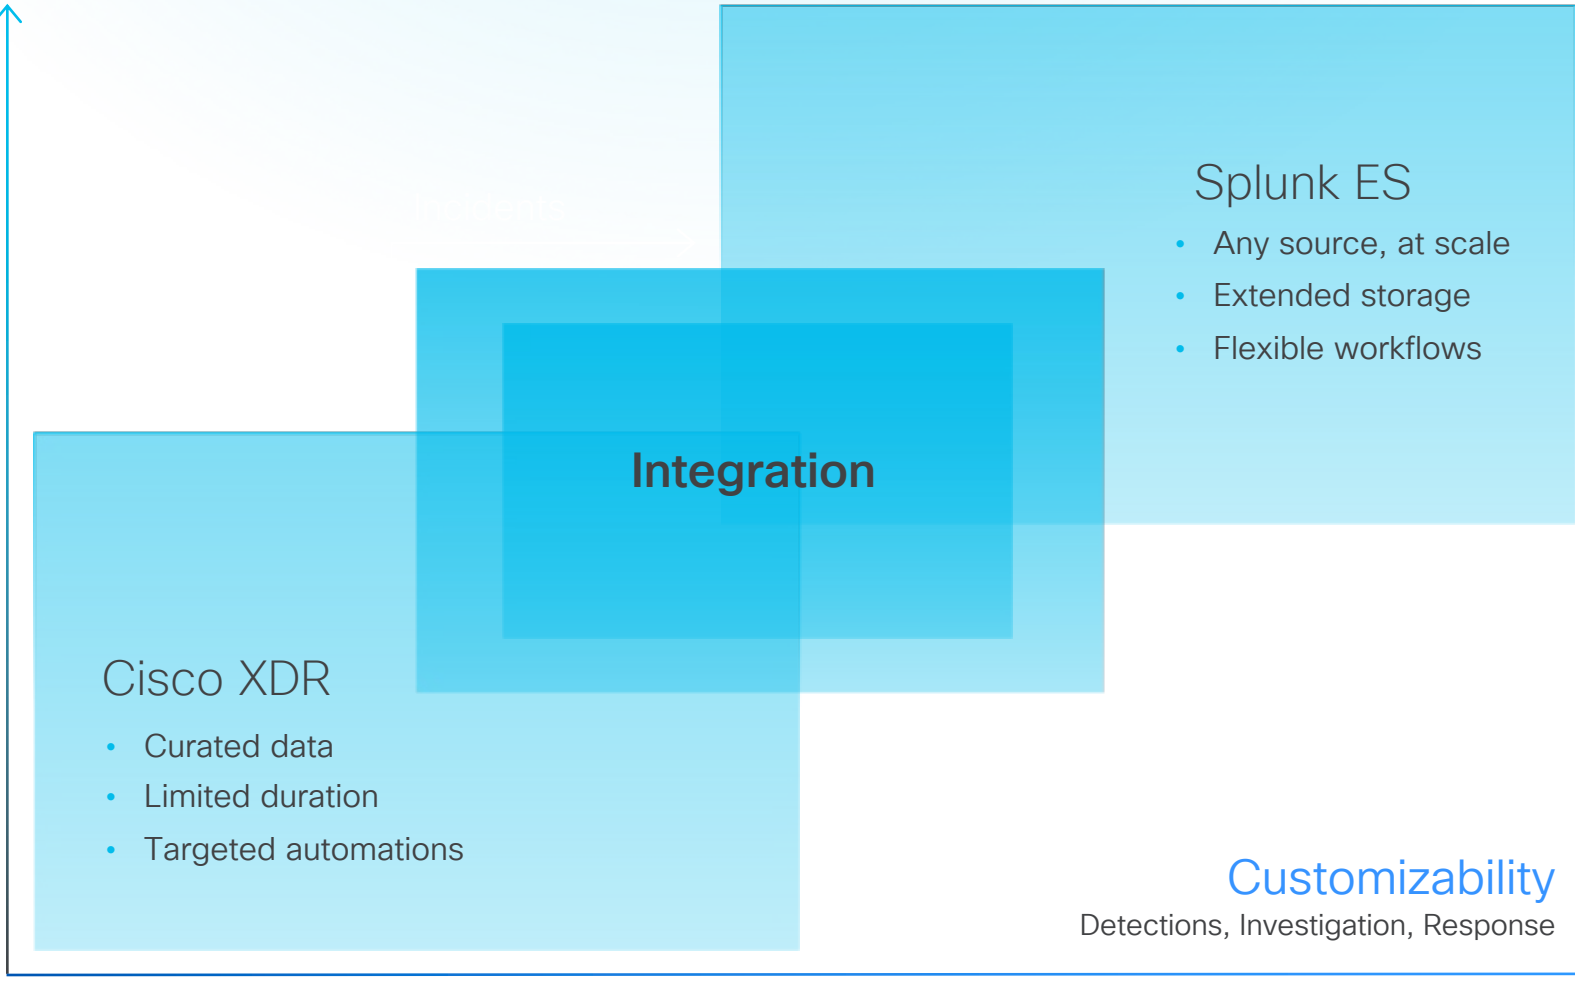

Splunk powers the next stage of their security journey

Cisco XDR + Splunk support full SOC maturity journey

Extensibility
Data Sources,
Integrations

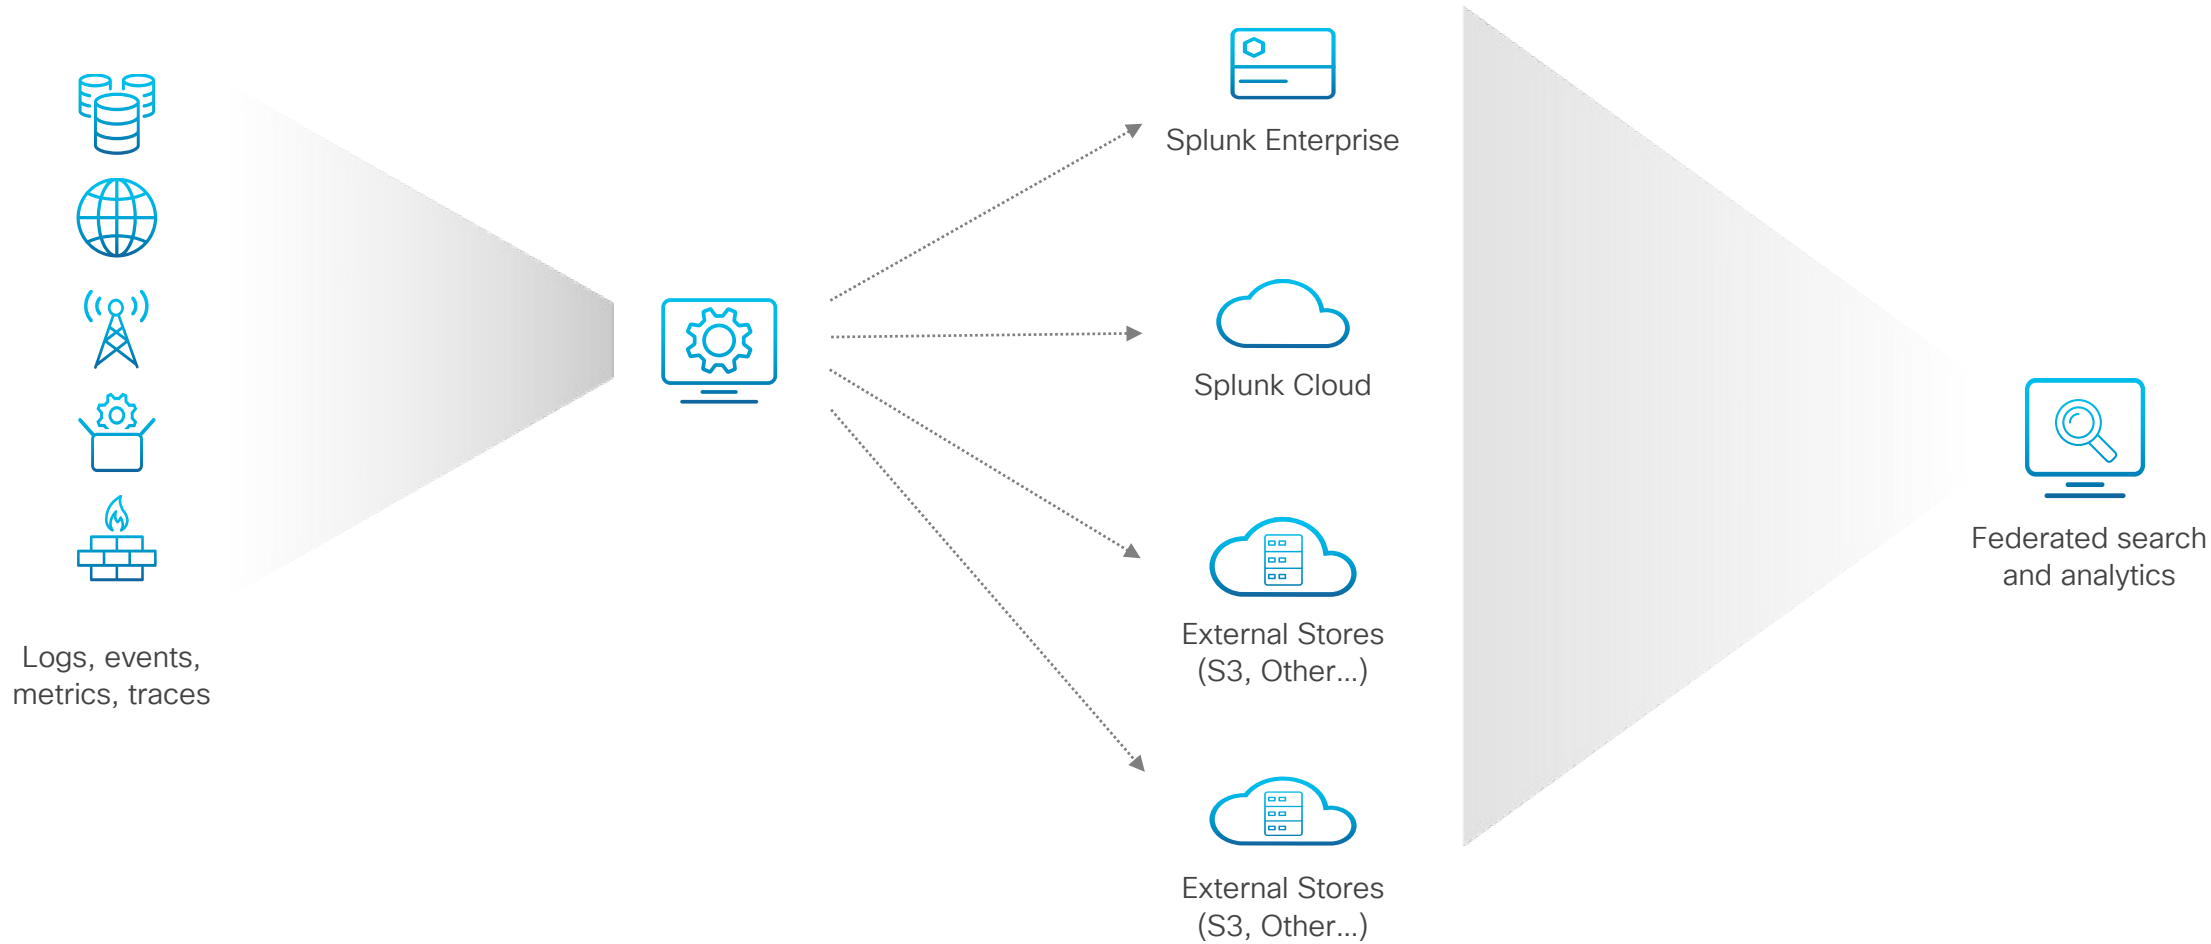

Enabling powerful security outcomes for customers

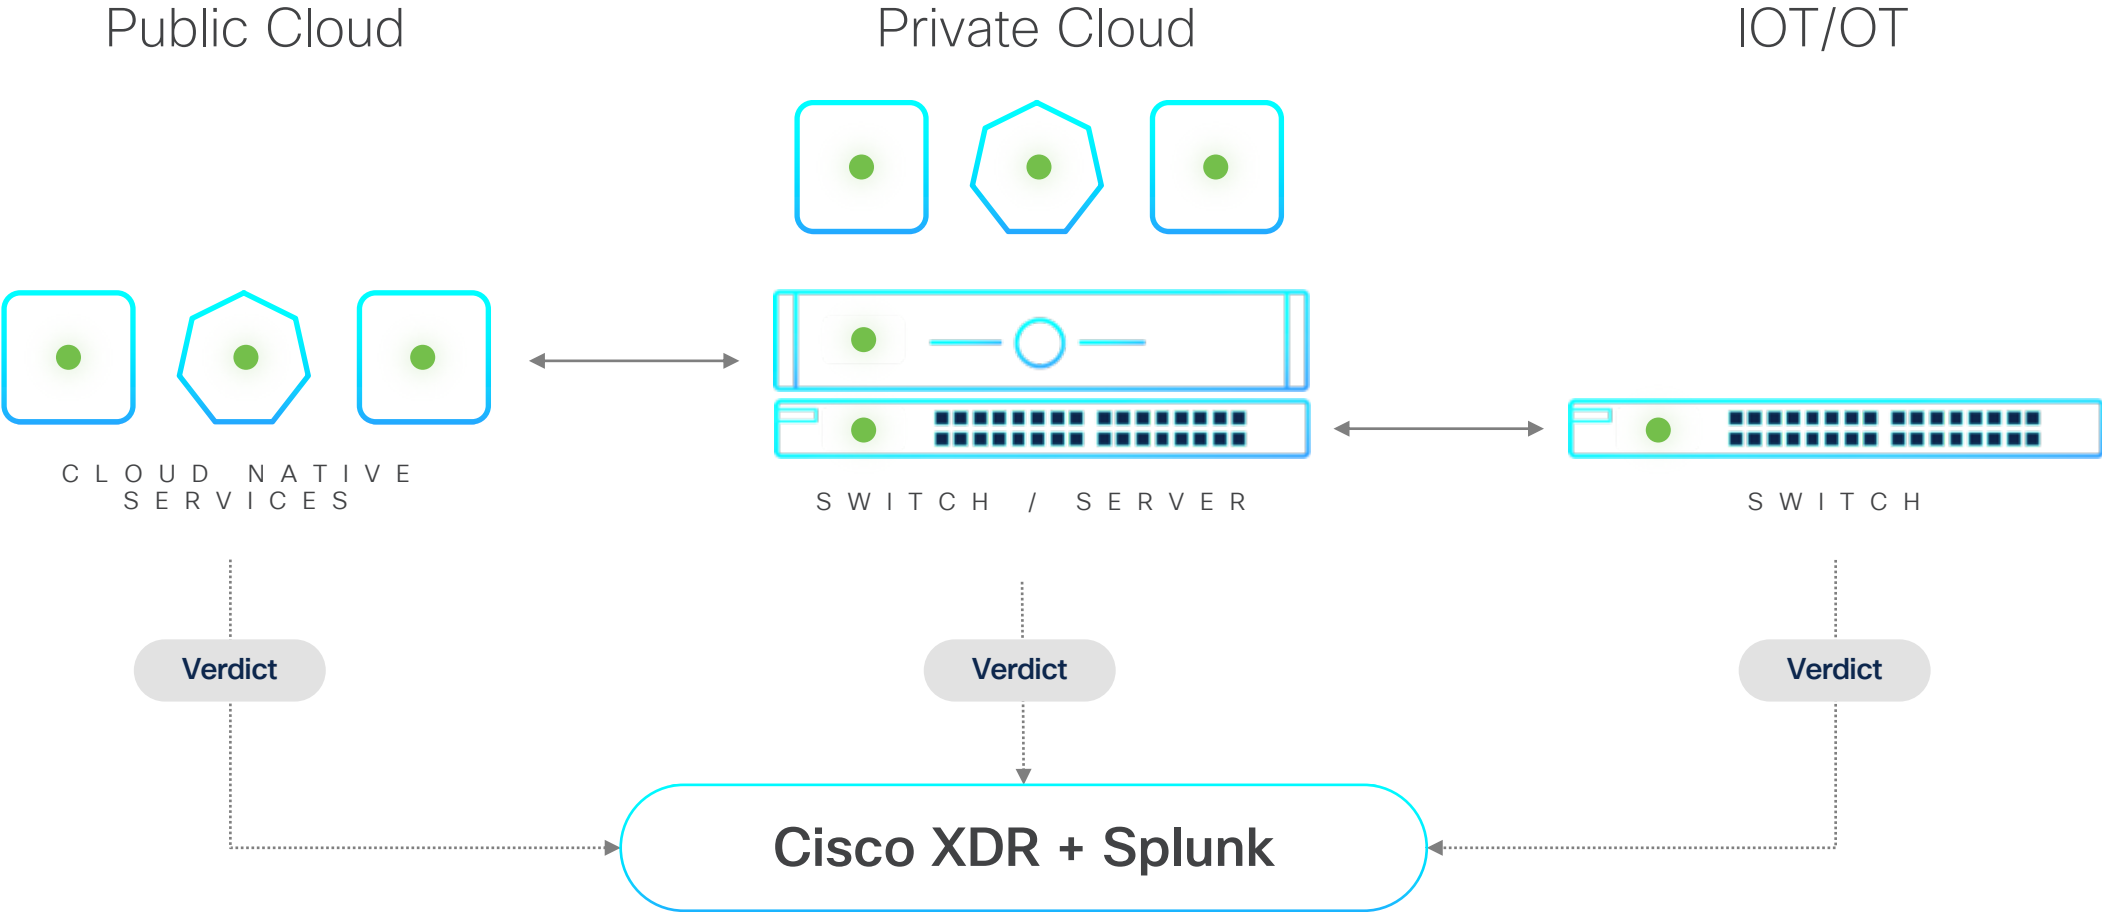

Network telemetry is critical to stopping lateral movement, but **too voluminous for a SIEM.**

To prevent future threats we need to **move analytics to the data**, not the data to the analytics.

Splunk can search and analyze data wherever it lives

Leveraging Hypershield to **reimagine security analytics** in the future

Forward-Looking Statements

These presentation slides and related webcast may be deemed to contain forward-looking statements, which are subject to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, among other things, statements regarding future events (such as statements regarding our growth and strategy) and the future financial performance of Cisco that involve risks and uncertainties. Readers are cautioned that these forward-looking statements are only predictions and may differ materially from actual future events or results due to a variety of factors, including: business and economic conditions and growth trends in the networking industry, our customer markets and various geographic regions; global economic conditions and uncertainties in the geopolitical environment; our development and use of artificial intelligence; overall information technology spending; the growth and evolution of the Internet and levels of capital spending on Internet-based systems; variations in customer demand for products and services, including sales to the service provider market and other customer markets; the return on our investments in certain priorities, key growth areas, and in certain geographical locations, as well as maintaining leadership in Networking and services; the timing of orders and manufacturing and customer lead times; supply constraints; changes in customer order patterns or customer mix; insufficient, excess or obsolete inventory; variability of component costs; variations in sales channels, product costs or mix of products sold; our ability to successfully acquire businesses and technologies and to successfully integrate and operate these acquired businesses and technologies; our ability to achieve expected benefits of our partnerships; increased competition in our product and service markets, including the data center market; dependence on the introduction and market acceptance of new product offerings and standards; rapid technological and market change; manufacturing and sourcing risks; product defects and returns; litigation involving patents, other intellectual property, antitrust, stockholder and other matters, and governmental investigations; our ability to achieve the benefits of restructurings and possible changes in the size and timing of related charges; cyber-attacks, data breaches or other incidents; vulnerabilities and critical security defects; terrorism; natural catastrophic events (including as a result of global climate change); any pandemic or epidemic; our ability to achieve the benefits anticipated from our investments in sales, engineering, service, marketing and manufacturing activities; our ability to recruit and retain key personnel; our ability to manage financial risk, and to manage expenses during economic downturns; risks related to the global nature of our operations, including our operations in emerging markets; currency fluctuations and other international factors; changes in provision for income taxes, including changes in tax laws and regulations or adverse outcomes resulting from examinations of our income tax returns; potential volatility in operating results; and other factors listed in Cisco's most recent reports on Form 10-K and Form 10-Q. The financial information contained in these presentation slides and related webcast should be read in conjunction with the consolidated financial statements and notes thereto included in Cisco's most recent report on Form 10-Q, as it may be amended from time to time. Cisco's results of operations for prior periods are not necessarily indicative of Cisco's operating results for any future periods. Any projections in these presentation slides and related webcast are based on limited information currently available to Cisco, which is subject to change. Although any such projections and the factors influencing them will likely change, Cisco will not necessarily update the information, since Cisco will only provide guidance at certain points during the year. Such information speaks only as of the date of these presentation slides and related webcast.
