August 4, 2022

Fellow Shareholders:

As you are well aware, we are living in a fundamentally changed financial environment, where the cost of capital is increasing. As a result, we believe the market’s appetite for profitable growth is clear. As we refine and adjust our business to reflect the changes in today’s macroeconomic environment, we are confident that Fubo’s model will prove to be both resilient and profitable. We intend to demonstrate, as we have done over the past several quarters, the inherent leverage in our model and our ability to achieve our long-term goal of positive free cash flow in 2025.

We see meaningful opportunities to continue to reduce internal costs as well as to drive improvement of content-related unit economics. We are continuing to work towards materially growing our high-margin advertising revenue. We believe in this economic environment that cord cutting will only increase and that Fubo will continue to benefit from this accelerating trend.

We continue to believe that an integrated wagering platform, offering both live video and a sportsbook, will result in the best viewing and gaming experience for consumers. However, as we have evaluated how best to scale these capabilities in today’s market, we have concluded that we will no longer pursue this opportunity on our own. Accordingly, our interactive wagering business is under strategic review. We are in internal and external discussions to determine the best path forward for Fubo’s gaming business and look forward to sharing more information.

Against the backdrop of our continued focus on reducing our cash burn, FuboTV posted strong revenue growth in the second quarter, with North American subscription revenue growth of 70% year-over-year. In addition, ad revenue grew 32% year-over-year. With $378.8 million in cash and short-term investments at quarter-end, we have a healthy liquidity position and achieved a sequential improvement in Adjusted Contribution Margin, Operating Cash Flow and Adjusted EBITDA (AEBITDA). We expect continued improvement in both Q3 and Q4 2022.

We continue to believe that our diversified content mix, aggregated and presented through a customized and interactive streaming experience, is the future of TV and the key to capturing mindshare and market share. In a category where media and tech companies continue to spend billions of dollars on premium shows and movies, and with the continued proliferation of proprietary streaming services, no longer does any individual streaming service possess “must have” status. As
consumers become more selective in their choice of streaming services, they are looking for a solution to cut through the onslaught of programming.

Our platform is uniquely positioned to address this unmet consumer need. As we alluded last quarter, we have started to enact a series of strategies designed to capture this massive opportunity while driving the operating leverage inherent in our business. These tactics are designed to strengthen monetization, including increasing take-rate of higher-ARPU products among new subscribers, and the migration of lower-ARPU subscribers to higher-ARPU bundles. We are starting to see the early signs of progress across these initiatives and expect that to continue through the second half of the year and into 2023.

While we ended the second quarter with double-digit year-over-year growth in North America streaming subscribers, our subscriber count came under pressure primarily due to underperformance of specific sports content during a typically low-growth part of the year. We believe we will finish the third quarter with a record number of subscribers as we enter the sports-heavy second half of the year.

In Rest of World (ROW) streaming, we ended the quarter ahead of expectations with approximately 347,000 total paid subscribers and $5.8 million in total revenue. Our Molotov integration is going well, and we reiterate that the unification of our technology platforms is expected to result in approximately $75 million of cost synergies between 2022 and 2025. As we track towards our technology-driven cost synergy goals, we are also pleased to note that ROW subscriber growth and cash flow has trended ahead of our expectations.

Net loss in the second quarter was $116.3 million. This includes a $10.7 million goodwill impairment charge associated with our gaming segment attributed to the decline in our market capitalization. We had a second quarter 2022 earnings per share (EPS) loss of $0.63, inclusive of a non-cash impairment charge of $0.06, $0.05 impact from operating expenses incurred for our wagering business, and $0.04 associated with the Molotov business acquired in 4Q21, compared to a loss of $0.68 in the second quarter of 2021. Adjusted EPS in the second quarter of 2022 was a loss of $0.45. Adjusted EPS excludes the impact of the non-cash impairment charge, stock-based compensation, the re-measurement of warrant liabilities, and the amortization of intangibles, amortization of debt discount and other non-cash items.

We ended the quarter with $378.8 million of cash and short-term investments. We remain highly disciplined in the management of our capital structure to afford FuboTV the financial flexibility and optionality to fund measured and disciplined growth initiatives.

Operating cash flow in the quarter was negative $91.3 million, including $7.7 million operating cash outflow associated with the wagering business. This represented a $35.3 sequential reduction in operating cash flow. As of June 30, 2022, FuboTV had 185,293,067 shares of common stock issued and outstanding.

---

1 Refer to the reconciliations of GAAP Net Loss to Non-GAAP Adjusted Net Loss in the non-GAAP information in the tables. Adjusted EPS represents Adjusted Net Loss divided by the number of weighted average shares outstanding for the applicable period.
Operational Highlights

Note: To allow a more meaningful assessment of the operational advancements in the business, the metrics reported in this “Operational Highlights” section refer to our North America streaming business.

Ad Sales

FuboTV achieved ad revenue of $21.7 million, an increase of 32% versus Q2 2021. We remain bullish on the long-term growth of CTV advertising and continue to see increased spend from our key advertisers. However, we note that macroeconomic uncertainty, inflation and other factors are creating somewhat less visibility in ad budgets for the balance of the year.

Ad ARPU softened year-over-year due to macro factors and compounded by scalability issues related to our technology stack. That said, we see this as temporary and remain confident in ad ARPU expansion in the second half of the year, as our work to reaccelerate ad ARPU growth comes to fruition. For example, we are actively deploying updated technology to more effectively monetize our inventory and by introducing new ad serving systems that enable us to better optimize key metrics.

Content Strategy

We continue to balance the aggregation of the best sports and entertainment content with vigilance around content costs in support of expanding unit economics.

We are focused on growing ad revenue and expanding our entertainment programming with minimal incremental content costs. Adding more free ad-supported television channels, or FAST channels, to fubo, is an important component of our strategy. During the quarter, we added 21 FAST channels for a current total of 40 FAST channels in our lineup. We are pacing well against our plan to offer approximately 100 FAST channels by the end of the year. As of now, FAST channels represent a single digit percentage of both viewing and ad revenue; however, we expect both of these metrics to grow in the coming quarters and help drive long term ad ARPU expansion.

We also expanded our market-leading Latino offering with the renewal of UnivisionTelevisa’s networks. We are delighted to continue our partnership with the world’s leading Spanish-language media company to bring their popular content to fubo customers at a reasonable cost. The renewal coincided with the start of the Liga MX soccer season, which has historically been a strong acquisition driver to our Latino channel package.

Additionally, we launched Hemisphere Media Group’s Pantaya Spanish-language content as a premium add-on to build attachment sales and upsells, which we expect will aid in our drive to positive AEBITDA. Indeed, as noted last quarter, content attachments are also another important lever to drive healthy contribution margin.
Interactivity

We believe the future of television will be interactive, and that future starts now with Fubo. Our differentiated offering is intended to provide consumers with the greatest breadth of premium content through a custom and personalized viewing experience optimized for sports viewership.

Fubo Sportsbook

Our Fubo Sportsbook, currently live in Arizona and Iowa, is distinct as the only owned-and-operated app in the U.S. that syncs live sports viewing and wagering in a single ecosystem. We continue to progress on our rollout of Fubo Sportsbook. We recently submitted our Fubo Sportsbook mobile app to the New Jersey Division of Gaming Enforcement and expect to be approved in time for the 2022 football season. In addition to New Jersey, we expect to launch an additional market in the ensuing weeks.

While our disciplined sportsbook progress continues, in light of a rapidly-evolving macro-economic environment, we believe it is important to be even more capital efficient than originally scoped. We are taking steps to de-risk our business and have made the decision to no longer go down the wagering path independently. As a result, we’re evaluating strategic opportunities for our wagering business.

Free Games

During the quarter, we launched a first-of-its-kind gaming experience that integrates free pick’em games on FuboTV with seamless access to Fubo Sportsbook - all within the single Fubo ecosystem. Pick’ems offer Fubo subscribers a fun way to interact with sports content, earn points and engage with
their friends and the FuboTV community for the chance to work their way up leaderboards. Once in the pick’em experience, customers in states where Fubo Sportsbook is live can also scan a QR code to access Fubo Sportsbook where they can place real-money wagers aligned with their picks. This marks the latest intersection of our TV and sportsbook.

Through these proprietary interactive experiences, which we have proudly built in-house, our goal is to turn passive TV viewers into active participants that are engaged through multiple Fubo products. This distinguishes us as an aggregator and gateway to TV relative to standalone studio-operated SVOD/AVOD services. Furthermore, over time, we believe this will expand ARPU and drive engagement and retention as users experience the breadth and depth of our platform.

A Unified Tech Platform

Following last year’s acquisition of Molotov, France’s leading live TV streaming service, our respective teams have been working hard to leverage the many technology synergies to create one robust global platform. As previously announced, we expect these synergies to generate approximately $75 million in cost savings over the next three years.

We believe that a unified global platform, where our apps are built on the same back-end technology, will provide a number of new critical capabilities that neither Fubo nor Molotov have today, thus leading to faster product development and a higher quality user experience. This platform is also intended to allow us to leverage a global technical talent pool, and enable us to launch the FuboTV product in additional international markets with minimal incremental costs.

Guidance

North America Streaming

Our Q3 2022 guidance projects 1,135,000 - 1,155,000 subscribers, representing 22% year-over-year growth at the midpoint, and revenue of $200 - $205 million, representing 29% year-over-year growth at the midpoint.

On a full-year basis we are updating our previous guidance, including revenue of $910 - $930 million, representing 45% year-over-year growth at the midpoint. We are also guiding to total year-end subscribers of 1,330,000 - 1,350,000, representing 19% year-over-year growth at the midpoint. This compares to our prior full-year revenue guidance of $1,020 - $1,030 million and subscriber guidance of 1,465,000 - 1,475,000. This downward revision of our previous full-year guidance takes into account the impact of our subscriber shortfall in the second quarter as well as additional conservatism in our subscriber outlook based on the changing macro environment, while the revenue guidance also reflects the expected pace of subscriber growth within the third quarter and throughout the remainder of the year.

Note that this guidance does not include any projected revenues from online sports wagering.
ROW Streaming

We are guiding to Q3 2022 revenue of $5.0 - $6.0 million and subscribers of 340,000 - 360,000.

On a full-year basis, we are increasing our previous guidance to revenue of $20 - $25 million and total year-end subscribers of 340,000 - 360,000. This compares to our prior full-year revenue guidance of $20-$25 million and total year-end subscribers of 300,000 - 310,000.

Please note that above guidance for North America streaming and ROW streaming reflects our internal forecasts as of today. As a result of, among other things, the current macroeconomic environment, our actual operating results may differ significantly from our guidance.

Conclusion

The second quarter was marked by double-digit year-over-year growth in North America across several of our KPIs: subscribers, total revenue and ad revenue. Notably, our Rest of World streaming business exceeded revenue and subscriber expectations. As sports is a seasonal business, we again expect to see growth in the second half of 2022 as the live sports calendar enters its busiest period.

Our balance sheet remains solid, and we were pleased to see improvements in our AEBITDA margins in the second quarter as we anticipate a return to growth in the second half of the year.

We remain steadfast in the aggregated streaming model and our mission to build the world’s leading global live TV streaming platform with the greatest breadth of premium content and interactivity. We continue to make strides toward our goal of positive cash flow and AEBITDA targets in 2025 and look forward to outlining our strategic plan, key initiatives and long-term financial targets at our first Investor Day on August 16, 2022.

Sincerely,

David Gandler, co-founder and CEO Edgar Bronfman Jr., executive chairman

Q2 2022 Earnings Live Conference Call

FuboTV CEO David Gandler and CFO John Janedis will host a live conference call today at 5:30 p.m. ET to deliver brief remarks followed by Q&A. The live call will be available on the Events page of FuboTV’s investor relations website. An archived replay will be available on FuboTV’s website following the call. Participants should join the call 10 minutes in advance to ensure that they are connected prior to the event.

More Information

We encourage you to read our full set of financial statements and SEC filings, and to sign up for email alerts, on the investor relations section of our website at ir.fubo.tv.
FuboTV intends to use its website as a disclosure channel and investors are encouraged to refer to it, as well as press releases and SEC filings. The company encourages reading the full set of financial statements and related disclosures in its Quarterly Report on Form 10-Q for the quarter ended June 30, 2022 that will be filed with the SEC.

About FuboTV

With a mission to build the world’s leading global live TV streaming platform with the greatest breadth of premium content and interactivity, FuboTV Inc. (NYSE: FUBO) aims to transcend the industry’s current TV model. FuboTV Inc. operates in the U.S., Canada, France and Spain.

Leveraging its proprietary data and technology platform optimized for live TV and sports viewership, FuboTV Inc. aims to turn passive viewers into active participants and define a new category of interactive sports and entertainment television. The company's sports-first cable TV replacement product, FuboTV, offers U.S. subscribers more than 100 live sports, news and entertainment networks and is the only live TV streaming platform with every Nielsen-rated sports channel (source: Nielsen Total Viewers, 2021). Subscribers can interact with FuboTV's live streaming experience through Fubo Sportsbook (in markets where available), free games and pick’ems, which are integrated into select sports content.

Forward-Looking Statements

This letter contains forward-looking statements of FuboTV Inc. (“FuboTV”) that involve substantial risks and uncertainties. All statements contained in this letter that do not relate to matters of historical fact are forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995, including statements regarding the Molotov acquisition, expected synergies of the technology platforms, our financial condition, anticipated financial performance, including quarterly and annual guidance and cash flow and Adjusted EBITDA targets, market opportunity, expectations regarding growth and profitability, future plans regarding subscription levels, business strategy and plans, the continued shift in consumer behavior and our strategic plans regarding Fubo Sportsbook. The words “could,” “will,” “plan,” “intend,” “anticipate,” “approximate,” “expect,” “potential,” “believe” or the negative of these terms or other similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. Actual results or events could differ materially from the plans, intentions and expectations disclosed in the forward-looking statements that FuboTV makes due to a number of important factors, including but not limited to risks related to our pursuit and engagement in acquisitions; our actual operating results may differ significantly from our guidance; risks related to FuboTV’s access to capital and fundraising prospects to fund its ongoing operations and support its planned growth; risks related to diverting management’s attention from FuboTV’s ongoing business operations to address integration and fundraising efforts; the restrictions imposed by content providers on our distribution and marketing of our products and services; our reliance on third party platforms to operate certain aspects of our business; risks related to our technology, as well as cybersecurity and data privacy-related risks; our ability to achieve or
maintain profitability; our revenue and gross profit are subject to seasonality; our operating results may fluctuate; our ability to attract and retain subscribers; we may not be able to license streaming content or other rights on acceptable terms; risks related to our ability to capitalize develop and market a sports wagering offering and the regulatory regime and related risks associated with such offering; risks related to the strategic review of our wagering business, including our ability to identify a strategic partner; risks related to the difficulty in measuring key metrics related to our business; risks related to the highly competitive nature of our industry; risks related to ongoing or future legal proceedings; and other risks, including the effects of industry, market, economic, political or regulatory conditions, future exchange and interest rates, and changes in tax and other laws, regulations, rates and policies, including the impact of COVID-19 on the broader market. Further risks that could cause actual results to differ materially from those matters expressed in or implied by such forward-looking statements are discussed in our Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2022 filed with the Securities and Exchange Commission (“SEC”) on May 10, 2022, our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2022 to be filed with the SEC, and our other periodic filings with the SEC. We encourage you to read such risks in detail. The forward-looking statements in this letter represent FuboTV’s views as of the date of this letter. FuboTV anticipates that subsequent events and developments will cause its views to change. However, while it may elect to update these forward-looking statements at some point in the future, it specifically disclaims any obligation to do so. You should, therefore, not rely on these forward-looking statements as representing FuboTV’s views as of any date subsequent to the date of this letter.

Key Metrics and Non-GAAP Measures

Paid Subscribers
We believe the number of paid subscribers is a relevant measure to gauge the size of our user base. Total subscribers that have completed registration with fuboTV, have activated a payment method (only reflects one paying user per plan), from which fuboTV has collected payment from in the month ending the relevant period. Users who are on a free (trial) period are not included in this metric.

Attachments
Attachments are incremental add-ons sold on top of the base subscription.

Subscriber Acquisition Cost (SAC)
Subscriber Acquisition Cost (SAC) reflects total GAAP sales and marketing expenses less headcount related to sales and marketing spend for a given period divided by Gross Paid Subscriber Additions for the same period.

Monthly Subscription Average Revenue per User (Monthly Sub ARPU)
Sub ARPU (Average Revenue Per User) is a fuboTV measure defined as total subscriber revenue collected in the period divided by the average daily paid subscribers in such period divided by the number of months in the period.

Monthly Advertising Average Revenue per User (Monthly Ad ARPU)
Ad ARPU (Average Revenue Per User) is a fuboTV measure defined as total advertising revenue in the period divided by the average daily paid subscribers in such period divided by the number of months in the period.

Monthly Average Revenue per User (Monthly ARPU)
We believe Monthly Average Revenue Per User (ARPU) is a relevant measure to gauge the revenue received per subscriber on a monthly basis. ARPU is a fuboTV measure defined as total revenue collected in the period (subscriber and advertising revenues excluding other revenues), also known as Platform Bookings, divided by the average daily paid subscribers in such period divided by the number of months in the period.

Average Cost Per User (ACPU)
We believe Monthly Average Cost Per User (ACPU) is a relevant measure to gauge our expenses per subscriber. ACPU reflects COGS per user defined as subscriber related expenses less payment processing for deferred revenue, In-App-Billing (IAB) fees for deferred revenue and other subscriber related expenses in a given period, divided by the average daily subscribers in the period, divided by the number of months in the period.

Adjusted Contribution Margin
We believe Adjusted Contribution Margin (ACM) is a relevant metric to gauge our per-subscriber profitability. ACM is a non-GAAP measure that measures costs against subscriber revenue. ACM is calculated by subtracting ACPU from ARPU.
Adjusted EBITDA
Adjusted EBITDA is a non-GAAP measure defined as Net Loss, adjusted for depreciation and amortization, stock-based compensation, income tax benefit, impairment of intangibles, other expenses, and one-time non-cash expenses.

Adjusted EBITDA Margin
Adjusted EBITDA Margin is a non-GAAP measure defined as Adjusted EBITDA divided by revenue.

Adjusted Net Loss
Adjusted Net Loss is a non-GAAP measure defined as Net Loss Attributable to Controlling Interest, adjusting for stock-based compensation, change in fair value of warrants, amortization of debt discount, amortization of intangible assets and other non-cash items.

Adjusted EPS (Earnings per Share)
Adjusted EPS is a non-GAAP measure defined as Adjusted Net Loss divided by weighted average shares outstanding.
Reconciliation of Non-GAAP Financial Measures

Certain measures used in this letter, including Adjusted EBITDA, Adjusted EBITDA Margin, ARPU, Sub ARPU, Ad ARPU, ACPU, Adjusted Contribution Margin, Adjusted Net Loss and Adjusted EPS are non-GAAP financial measures. We believe these are useful financial measures for investors as they are supplemental measures used by management in evaluating our core operating performance. Our non-GAAP financial measures have limitations as analytical tools and you should not consider them in isolation or as a substitute for an analysis of our results under GAAP. There are a number of limitations related to the use of these non-GAAP financial measures versus their nearest GAAP equivalents. First, these non-GAAP financial measures are not a substitute for GAAP financial measures. Second, these non-GAAP financial measures may not provide information directly comparable to measures provided by other companies in our industry, as those other companies may calculate their non-GAAP financial measures differently.

The following tables reconcile the most directly comparable GAAP financial measure to the non-GAAP financial measure.
