1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of ReliaStar Life Insurance Company of New York (the "Company" or "RNY") are presented on the basis of accounting practices prescribed or permitted by the New York Department of Financial Services ("NYDFS").

The NYDFS recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the New York Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of New York. The Superintendent of the NYDFS has the right to permit other specific practices that deviate from prescribed practices.

The NYDFS superintendent approved a permitted accounting practice that allows the Company to hold reserves computed in accordance with VM-A and VM-C for individual term life policies that convert into universal life policies, instead of Valuation Manual 20: Requirements for Principle-Based Reserves for Life Products ("VM-20") reserves as required by the valuation manual. As of June 30, 2025, there were 106 such policies with total face amount of $22,596,000 and reserves of $417,932.

Other than the permitted practice above, the Company did not have any prescribed or permitted practices as of June 30, 2025 and December 31, 2024.

C. Accounting Policy

(2) Bonds not backed by other loans are stated at either amortized cost using the yield to worst method or the lower of cost or fair market value. The Company does not have any SVO-Identified investments as defined in SSAP No. 26, *Bonds*.

(6) Asset-backed securities are stated at either amortized cost or the lower of amortized cost or fair market value. Amortized cost is determined using the interest method and includes anticipated prepayments. The prospective adjustment method is used to determine the amortized cost for the majority of asset-backed securities. For certain securities, the retrospective adjustments methodology is utilized, including agency and non-agency pools.

The Company made no significant changes to its accounting policies or practices as of June 30, 2025.

Certain amounts in the Company's statutory basis financial statements have been reclassified to conform to the 2025 financial statement presentation.

D. Going Concern

None

2. Accounting Changes and Corrections of Errors

In August 2023, the NAIC adopted revisions to Statement of Statutory Accounting Principles No. 26 ("SSAP 26") and Statement of Statutory Accounting Principles No. 43 ("SSAP 43") to reflect accounting and reporting guidance under Principles Based Bond Definition ("PBBD") for qualified investments. As a result of these adoptions, investments qualified as issuer credit obligation ("ICO") are reported under SSAP 26; investments qualified as asset-backed security ("ABS") are reported under SSAP 43.

In March 2024, the NAIC adopted revisions to Statement of Statutory Accounting Principles No.21 ("SSAP 21") to reflect accounting and reporting guidance for investments that do not meet the requirements of PBBD, and for residual tranches or interests/loss positions.

The adopted PBBD revisions to SSAP 26, SSAP 43, and SSAP 21 are effective on January 1, 2025. The aggregate book adjusted carrying value for all securities reclassified off Schedule D-1 is ICO's of $24,029,277 and ABS' of $928,973. The measurement basis for the transferred securities did not change. There is no change to the Company's net income or capital and surplus.

The company adopted a practical expedient of holding 101% of account value as the reserve for an immaterial closed block of fixed indexed annuities. The impact to surplus is zero.

D. Asset-backed Securities

(1) Prepayment assumptions for asset-backed securities are obtained from third party services, broker dealer survey values or internal estimates.

(2) The Company did not have any Other than Temporary Impairment ("OTTI") recognized in accordance with asset-backed securities subject to SSAP No. 43 as of June 30, 2025 due to intent to sell or inability or lack of intent to hold to recovery.

(3) The Company did not have any OTTI’s that were recognized in the current reporting period in accordance with asset-backed securities subject to SSAP No. 43 for the period April 1, 2025 to June 30, 2025.

(4) The following table shows all impaired securities at June 30, 2025 in the aggregate for which an OTTI has not been recognized in earnings as a realized loss, including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains:

a. Aggregate amount of unrealized losses:			
	1. Less than 12 Months	$	85,396
	2. 12 Months or Longer	$	31,449,096
b. The aggregate related fair value of securities with unrealized losses:			
	1. Less than 12 Months	$	15,282,170
	2. 12 Months or Longer	$	205,961,286

(5) If the fair value of an asset-backed security is less than its amortized cost basis at the balance sheet date, the Company determines whether the impairment is other-than-temporary. Amortized cost basis includes adjustments made to the cost of an investment for accretion, amortization, collection of cash and previous OTTI recognized as a realized loss.

The general categories of information that the Company considers in reaching the conclusion that an impairment is other-than-temporary are as follows:

Intent to Sell - if the Company intends to sell the asset-backed security (that is, it has decided to sell the security), an OTTI is considered to have occurred.

Intent and Ability to Hold - if the Company does not intend to sell the asset-backed security, the Company determines whether it has the intent and ability to retain the investment in the security for a period of time sufficient to recover the amortized cost basis. If the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost basis, an OTTI shall be considered to have occurred.

Recovery of the Amortized Cost Basis - if the Company does not expect to recover the entire amortized cost basis of the security, the Company would be unable to assert that it will recover its amortized cost basis even if it does not intend to sell the security and the entity has the intent and ability to hold. Therefore, in those situations, an OTTI shall be considered to have occurred. In assessing whether the entire amortized cost basis of the security will be recovered, the Company compares the present value of cash flows expected to be collected from the security with the amortized cost basis of the security. If present value of cash flows expected to be collected is less than the amortized cost basis of the security, the entire amortized cost basis of the security will not be recovered (that is, a non-interest related decline exists), and an OTTI shall be considered to have occurred.

The Company conducts a thorough quarterly review of all asset-backed security holdings to conclude if the amortized cost basis of those securities is recoverable. This review is documented at a detailed level and encompasses numerous factors and assumptions. The overall credit tracking process yields a variety of key data that supports the impairment decision making process. The review process and related assumptions are updated quarterly based on trends in the marketplace.

As part of the quarterly review, the Company identifies securities whose ratio of credit enhancement to serious delinquency does not exhibit ample protection against principal loss. Those securities are put through a more detailed analysis which covers, among other factors, (a) an analysis of the underlying collateral characteristics; (b) a review of the historical performance of the collateral in the deal; (c) structural analysis of the security; and (d) cash flow scenario analysis.

The prospective adjustment method is used to determine the amortized cost for the majority of asset-backed securities as well as securities that have experienced an OTTI. For certain securities, including Agency-backed securities, the retrospective adjustment method is used to determine amortize cost.

The market values for asset-backed securities are obtained as follows:

1. For securities that are considered marketable - market values are received from third party pricing services or by obtaining a bid price from brokerage firms engaged in the business of trading those securities.
2. For securities that were privately placed and for which no ready market exists - the Company establishes fair market values using a matrix pricing system which considers key factors such as credit quality, industry sector, size of the issuer and transaction structure. A limited portion of the private placement portfolio is priced independently of the matrix system as described above.

In July 2025, the One Big Beautiful Bill Act ("OBBBA") was signed into law, which includes changes to the Internal Revenue Code. The Company is still assessing but does not anticipate that the OBBBA will result in a material impact to surplus from these changes.

10. Information Concerning Parent, Subsidiaries and Affiliates

D. Amounts Due To/From Related Parties

The Company has entered into a reciprocal loan agreement with Voya Financial, Inc. to promote efficient management of cash and liquidity and to provide for unanticipated short-term cash requirements. As of June 30, 2025, the Company had $74,372,096 outstanding receivable including principle and interest from Voya Financial, Inc. and no outstanding payable under reciprocal loan agreement between the Company and Voya Financial, Inc.

20. Fair Value Measurements

A. Fair Value Measurements at Reporting Date

(1) The table below shows assets and liabilities measured and reported at net asset value ("NAV") or fair value in which the fair value measurements use quoted prices in active markets for identical assets or liabilities (Level 1), significant other observable inputs (Level 2) and significant unobservable inputs (Level 3) as of June 30, 2025:

(2) The table below summarizes the changes in fair value of the Company's assets and liabilities using significant unobservable inputs (Level 3) during the reporting period of April 1, 2025 to June 30, 2025:

Description	Beginning balance at April 1, 2025	Transfers into Level 3	Transfers out of Level 3	Total gains and (losses) included in Net Income	Total gains and (losses) included in Surplus	Purchases	Issuances	Sales	Settlements	Ending balance at June 30, 2025

b. Liabilities										
Total Liabilities	$ —	$ —	$ —	$ —	$ —	$ —	$ —	$ —	$ —	$ —

There were no transfers into or out of Level 3 during the period of April 1, 2025 to June 30, 2025.

(3) The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument.

Financial assets and liabilities recorded at fair value on the balance sheet are categorized as follows:

- Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.

- Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:

  - Quoted prices for similar assets or liabilities in active markets;
  - Quoted prices for identical or similar assets or liabilities in non-active markets;
  - Inputs other than quoted market prices that are observable; and
  - Inputs that are derived principally from or corroborated by observable market data through correlation or other means.

- Level 3 - Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These valuations, whether derived internally or obtained from a third party, use critical assumptions that are not widely available to estimate market participant expectations in valuing the asset or liability.

(4) Fair values are based on quoted market prices when available. When market prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model or input used.

Derivatives are carried at fair value, which is determined using the Company's derivative accounting system in conjunction with observable key financial data from third-party sources, such as yield curves, exchange rates, S&P 500 Index prices, Secured Overnight Financing Rate ("SOFR") and Overnight Index Swap Rates ("OIS"). For those derivatives that are unable to be valued by the accounting system, the Company typically utilizes values established by third-party brokers. Derivatives which qualify for special hedge accounting treatment are reported in a manner that is consistent with the accounting for the hedged asset or liability.

(5) See Note 20A(1-4) for disclosures on derivative assets and liabilities.

25. Change in Incurred Losses and Loss Adjustment Expenses

A. Changes in Incurred Losses and Loss Adjustment Expenses of prior years

Reserves at December 31, 2024 were $41,110,799. As of June 30, 2025, $25,582,829 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now $7,549,126 as a result of re-estimation of unpaid claims and claim adjustment expenses principally on group life, accident and health and stop loss lines of insurance. Therefore, there has been a $7,978,844 favorable prior-year development since December 31, 2024. The change is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims. Included in this change, the Company experienced no favorable prior year loss development on retrospectively rated policies. However, the business to which it relates may be subject to premium adjustments.
