STATEMENT AS OF June 30, 2026 OF THE ReliaStar Life Insurance Company of New York

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of ReliaStar Life Insurance Company of New York (the "Company" or "RNY") are presented on the basis of accounting practices prescribed or permitted by the New York Department of Financial Services ("NYDFS").

The NYDFS recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the New York Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of New York. The Superintendent of the NYDFS has the right to permit other specific practices that deviate from prescribed practices.

The NYDFS superintendent approved a permitted accounting practice that allows the Company to hold reserves computed in accordance with VM-A and VM-C for individual term life policies that convert into universal life policies, instead of Valuation Manual 20:Requirements for Principle-Based Reserves for Life Products ("VM-20") reserves as required by the valuation manual. As of June 30, 2026, there were 113 such policies with total face amount of \$27,157,000 and reserves of \$503,492.

Other than the permitted practice above, the Company did not have any prescribed or permitted practices as of June 30, 2026 and December 31, 2025.

- (5) If the fair value of an asset-backed security is less than its amortized cost basis at the balance sheet date, the Company determines whether the impairment is other-than-temporary. Amortized cost basis includes adjustments made to the cost of an investment for accretion, amortization, collection of cash and previous OTTI recognized as a realized loss.

The general categories of information that the Company considers in reaching the conclusion that an impairment is other-than-temporary are as follows:

**Intent to Sell** - if the Company intends to sell the asset-backed security (that is, it has decided to sell the security), an OTTI is considered to have occurred.

**Intent and Ability to Hold** - if the Company does not intend to sell the asset-backed security, the Company determines whether it has the intent and ability to retain the investment in the security for a period of time sufficient to recover the amortized cost basis. If the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost basis, an OTTI shall be considered to have occurred.

**Recovery of the Amortized Cost Basis** - if the Company does not expect to recover the entire amortized cost basis of the security, the Company would be unable to assert that it will recover its amortized cost basis even if it does not intend to sell the security and the entity has the intent and ability to hold. Therefore, in those

NOTES TO FINANCIAL STATEMENTS

situations, an OTTI shall be considered to have occurred. In assessing whether the entire amortized cost basis of the security will be recovered, the Company compares the present value of cash flows expected to be collected from the security with the amortized cost basis of the security. If present value of cash flows expected to be collected is less than the amortized cost basis of the security, the entire amortized cost basis of the security will not be recovered (that is, a non-interest related decline exists), and an OTTI shall be considered to have occurred.

The Company conducts a thorough quarterly review of all asset-backed security holdings to conclude if the amortized cost basis of those securities is recoverable. This review is documented at a detailed level and encompasses numerous factors and assumptions. The overall credit tracking process yields a variety of key data that supports the impairment decision making process. The review process and related assumptions are updated quarterly based on trends in the marketplace.

As part of the quarterly review, the Company identifies securities whose ratio of credit enhancement to serious delinquency does not exhibit ample protection against principal loss. Those securities are put through a more detailed analysis which covers, among other factors, (a) an analysis of the underlying collateral characteristics; (b) a review of the historical performance of the collateral in the deal; (c) structural analysis of the security; and (d) cash flow scenario analysis.

The prospective adjustment method is used to determine the amortized cost for the majority of asset-backed securities as well as securities that have experienced an OTTI. For certain securities, including agency-backed securities, the retrospective adjustment method is used to determine amortize cost.

The market values for asset-backed securities are obtained as follows:

- 1. For securities that are considered marketable - market values are received from third party pricing services or by obtaining a bid price from brokerage firms engaged in the business of trading those securities.
- 2. For securities that were privately placed and for which no ready market exists - the Company establishes fair market values using a matrix pricing system which considers key factors such as credit quality, industry sector, size of the issuer and transaction structure. A limited portion of the private placement portfolio is priced independently of the matrix system as described above.

There were no transfers into or out of Level 3 during the period of April 1, 2026 to June 30, 2026.

(3) The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument.

Financial assets and liabilities recorded at fair value on the balance sheet are categorized as follows:

- Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.
- Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:
  - Quoted prices for similar assets or liabilities in active markets;
  - Quoted prices for identical or similar assets or liabilities in non-active markets;
  - Inputs other than quoted market prices that are observable; and
  - Inputs that are derived principally from or corroborated by observable market data through correlation or other means.
- Level 3 - Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These valuations, whether derived internally or obtained from a third party, use critical assumptions that are not widely available to estimate market participant expectations in valuing the asset or liability.

STATEMENT AS OF June 30, 2026 OF THE ReliaStar Life Insurance Company of New York

NOTES TO FINANCIAL STATEMENTS

(4) Fair values are based on quoted market prices when available. When market prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model or input used.

Derivatives are carried at fair value, which is determined using the Company’s derivative accounting system in conjunction with observable key financial data from third-party sources, such as yield curves, exchange rates, S&P 500 Index prices, Secured Overnight Financing Rate ("SOFR") and Overnight Index Swap Rates ("OIS"). For those derivatives that are unable to be valued by the accounting system, the Company typically utilizes values established by third-party brokers. Derivatives which qualify for special hedge accounting treatment are reported in a manner that is consistent with the accounting for the hedged asset or liability.

(5) See Note 20A(1-4) for disclosures on derivative assets and liabilities.

25. Change in Incurred Losses and Loss Adjustment Expenses

- A. Changes in Incurred Losses and Loss Adjustment Expenses of prior years  
Reserves at December 31, 2025 were \$43,833,099. As of June 30, 2026, \$29,566,826 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$5,372,825 as a result of re-estimation of unpaid claims and claim adjustment expenses principally on group life, accident and health and stop loss lines of insurance. Therefore, there has been a \$8,893,448 favorable prior-year development since December 31, 2025. The change is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims. Included in this change, the Company experienced no favorable prior year loss development on retrospectively rated policies. However, the business to which it relates may be subject to premium adjustments.
