NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of ReliaStar Life Insurance Company of New York (“the Company” or "RNY") are presented on the basis of accounting practices prescribed or permitted by the New York Department of Financial Services (“NYDFS”).

The New York Department of Financial Services recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the New York Insurance Law. The National Association of Insurance Commissioners' (“NAIC”) Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of New York. The Superintendent of the New York Department of Financial Services has the right to permit other specific practices that deviate from prescribed practices.

The Company did not have any prescribed or permitted practices as of September 30, 2013 and December 31, 2012.

The Company made no significant changes to its accounting policies or practices as of September 30, 2013.

Certain amounts in the Company’s statutory basis financial statements have been reclassified to conform to the 2013 financial statement presentation.

2. Accounting Changes and Corrections of Errors

A. Correction of Errors

In 2013, the Company determined that it had incorrectly estimated its 2012 tax adjustment for deferred and uncollected premiums by \$17,225,767. As a result of the error, federal and foreign income taxes incurred (line 32, Summary of Operations) was understated by \$6,029,018 (\$17,225,767 x 35%) resulting in overstatement of surplus by the same amount. Current federal and foreign income tax recoverable (Assets, line 18.1) was overstated and current federal income taxes (line 15.1, Liabilities, Surplus and Other Funds) was understated by a net amount of \$6,029,018 (i.e., line 18.1 overstated by \$299,702 and line 15.1 understated by \$5,729,316). In addition, net deferred tax assets (line 18.2, Assets, column 1) increased by \$6,029,018, offset by an increase in nonadmitted assets (Line 18.2, Assets, column 2). Line 53 of the Summary of Operations page has been adjusted in the current year to correct for this error as a prior period adjustment.

D. Loan-Backed Securities

- (1) Prepayment assumptions for loan-backed and structured securities are obtained from third party services, broker dealer survey values or internal estimates.
- (2) The Company did not have any other-than-temporary impairments (“OTTI”) recognized in accordance with structured securities subject to Statement of Statutory Accounting Principles (“SSAP”) No. 43R, *Loan-backed and Structured Securities* (“SSAP No. 43R”), as of September 30, 2013 due to intent to sell or inability or lack of intent to hold to recovery.
- (3) The following table discloses in detail the OTTI’s recognized by the Company in accordance with structured securities subject to SSAP No. 43R as of September 30, 2013:

(1)	(2)	(3)	(4)	(5)	(6)	(7)
CUSIP	Book/Adjusted Carrying Value Amortized Cost Before Current Period OTTI	Present Value of Projected Cash Flows	Recognized Other-Than-Temporary Impairment	Amortized Cost After Other-Than-Temporary Impairment	Fair Value at Time of OTTI	Date of Financial Statement Where Reported
17307GZK7	\$ 462,961	\$ 462,653	\$ 308	\$ 462,653	\$ 460,841	3/31/2013
57643MMM3	549,464	540,122	9,342	540,122	538,851	6/30/2013
17307GZK7	413,296	411,038	2,257	411,038	390,819	9/30/2013
Total			\$ 11,907			

- (4) The following table shows all impaired securities at September 30, 2013 in the aggregate for which an OTTI has not been recognized in earnings as a realized loss, including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains:

a. Aggregate amount of unrealized losses:

1. Less than 12 Months	\$ 233,354
2. 12 months or Longer	\$ 642,512

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$ 18,280,946
2. 12 months or Longer	\$ 3,814,529

- (5) If the fair value of a loan-backed or structured security is less than its amortized cost basis at the balance sheet date, the Company determines whether the impairment is other-than-temporary. Amortized cost basis includes adjustments made to the cost of an investment for accretion, amortization, collection of cash and previous OTTI recognized as a realized loss.

The general categories of information that the Company considers in reaching the conclusion that an impairment is other-than-temporary are as follows:

Intent to Sell - if the Company intends to sell the loan-backed or structured security (that is, it has decided to sell the security), an OTTI is considered to have occurred.

Intent and Ability to Hold - if the Company does not intend to sell the loan-backed or structured security, the Company determines whether it has the intent and ability to retain the investment in the security for a period of time sufficient to recover the amortized cost basis. If the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost basis, an OTTI shall be considered to have occurred.

Recovery of the Amortized Cost Basis - if the Company does not expect to recover the entire amortized cost basis of the security, the Company would be unable to assert that it will recover its amortized cost basis even if it does not intend to sell the security and the entity has the intent and ability to hold. Therefore, in those situations, an OTTI shall be considered to have occurred. In assessing whether the entire amortized cost basis of the security will be recovered, the Company compares the present value of cash flows expected to be collected from the security with the amortized cost basis of the security. If present value of cash flows expected to be collected is less than the amortized cost basis of the security, the entire amortized cost basis of the security will not be recovered (that is, a non-interest related decline exists), and an OTTI shall be considered to have occurred.

The Company conducts a thorough quarterly review of all loan-backed and structured security holdings to conclude if the amortized cost basis of those securities is recoverable. This review is documented at a detailed level and encompasses numerous factors and assumptions. The overall credit tracking process yields a variety of key data that supports the impairment decision making process. The review process and related assumptions are updated quarterly based on trends in the marketplace.

NOTES TO FINANCIAL STATEMENTS

As part of the quarterly review, the Company identifies securities whose ratio of credit enhancement to serious delinquency does not exhibit ample protection against principal loss. Those securities are put through a more detailed analysis which covers, among other factors, (a.) an analysis of the underlying collateral characteristics; (b.) a review of the historical performance of the collateral in the deal; (c.) structural analysis of the security; and (d.) cash flow scenario analysis.

The retrospective adjustment method is used to determine the amortized cost for the majority of loan-backed and structured securities. For certain securities, the prospective adjustments methodology is utilized, including interest-only securities and securities that have experienced an OTTI.

The market values for loan-backed and structured securities are obtained as follows:

1. For securities that are considered marketable – market values are received from third party pricing services or by obtaining a bid price from brokerage firms engaged in the business of trading those securities.
2. For securities that were privately placed and for which no ready market exists - the Company establishes fair market values using a matrix pricing system which considers key factors such as credit quality, industry sector, size of the issuer and transaction structure. A limited portion of the private placement portfolio is priced independently of the matrix system as described above.

The terms of the agreements require that these balances be settled within specified due dates. The Company recorded a nonadmitted asset charge to surplus of \$1,834 for amounts due from affiliated companies that were not settled within 90 days or do not have written affiliated agreements on file under the guidance of SSAP No. 25, *Accounting for and Disclosures about Transactions with Affiliates and Other Related Parties*.

E. All Other Contingencies

Legal Proceedings - The Company is involved in threatened or pending lawsuits/arbitrations arising from the normal conduct of business. Due to the climate in insurance and business litigation/arbitration, suits against the Company sometimes include claims for substantial compensatory, consequential or punitive damages and other types of relief. Moreover, certain claims are asserted as class actions, purporting to represent a group of similarly situated individuals. While it is not possible to forecast the outcome of such lawsuits/arbitrations, in light of existing insurance, reinsurance

NOTES TO FINANCIAL STATEMENTS

and established reserves, it is the opinion of management that the disposition of such lawsuits/arbitrations will not have a materially adverse effect on the Company's operations or financial position.

Regulatory Matters - As with many financial services companies, the Company and its affiliates periodically receive informal and formal requests for information from various state and federal governmental agencies and self-regulatory organizations in connection with examinations, inquiries, investigations and audits of the products and practices of the Company or the financial services industry. Considerable regulatory scrutiny currently is being focused on whether and to what extent life insurance companies are using the United States Social Security Administration's Death Master File ("SSDMF") to proactively ascertain when customers have deceased and to pay benefits even where no claim for benefits has been made. Along these lines, the NYDFS has directed the Company to use information available on the SSDMF to identify any death claim that may be due under life insurance policies, annuity contracts or retained asset accounts that have not been previously reported through historical claim reporting processing, implement procedures to locate beneficiaries, make prompt payments as necessary, and to report to the NYDFS the results of using the data. The Company also has been reviewing whether benefits are owed and whether reserves are adequate in instances where an insured appears to have died, but no claim for death benefits has been made. Some of the investigations, exams, inquiries, and audits could result in regulatory action against the Company. The potential outcome of such action is difficult to predict but could subject the Company to adverse consequences, including, but not limited to, settlement payments, additional payments to beneficiaries, and additional escheatment of funds deemed abandoned under state laws. They may also result in fines and penalties and changes to the Company's procedures for the identification and escheatment of abandoned property, and other financial liability. While it is not possible to predict the outcome of any such action, or internal or external investigations, examinations, reviews or inquiries, management does not believe that they will have a material adverse effect on the Company's financial position. It is the practice of the Company and its affiliates to cooperate fully in these matters. On June 6, 2013, the Company executed a Global Resolution Agreement ("GRA") establishing a process to resolve the audit of the Company's compliance with unclaimed property laws being conducted by a majority of the states. The GRA became effective July 26, 2013. The GRA establishes procedures for determining whether amounts may be payable under certain life insurance policies, annuity contracts, and retained asset accounts. It also establishes procedures for seeking to locate and pay beneficiaries and owners and for escheating benefits (with interest in certain circumstances) to relevant jurisdictions.

On August 31, 2013, the Company executed a Regulatory Settlement Agreement ("RSA") to settle a multi-state market conduct examination ("Exam") regarding benefit payment practices, procedures and policy administration relating to claims, and use of the SSDMF, including efforts to identify owners and beneficiaries of unclaimed benefits. The RSA establishes procedures for determining whether benefits may be payable under certain life insurance policies, annuity contracts, and retained asset accounts. It also establishes procedures for seeking to locate and pay beneficiaries and owners. The RSA became effective on September 4, 2013. Fifty Departments of Insurance have executed the RSA. Under the RSA, the Company paid \$2,924,619 for the examination, compliance and monitoring costs associated with the Exam.

There were no transfers between Level 1 and Level 2 during the reporting period of July 1, 2013 to September 30, 2013. The Company’s policy is to recognize transfers in and transfers out as of the beginning of the most recent quarterly reporting period.

(2) The table below summarizes the changes in fair value of the Company’s assets and liabilities using significant unobservable inputs (Level 3) during the reporting period of July 1, 2013 to September 30, 2013:

Description	Beginning balance at 07/01/2013	Transfers into Level 3	Transfers out of Level 3	Total gains and (losses) included in Net Income	Total gains and (losses) included in Surplus	Purchases	Issuances	Sales	Settlements	Ending balance at 09/30/2013

There were no transfers into or out of Level 3 during the reporting period of July 1, 2013 to September 30, 2013. Securities that are primarily valued using independent broker quotes, when prices are not available from one of the commercial pricing services, are reflected as transfers into Level 3. These securities are generally less liquid with very limited trading activity or where less transparency exists corroborating the inputs to the valuation methodologies. When securities are valued using more widely available information, the securities are transferred out of Level 3 and into Level 1 or 2, as appropriate.

(3) The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument.

Financial assets and liabilities recorded at fair value on the balance sheet are categorized as follows:

- Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market

NOTES TO FINANCIAL STATEMENTS

- Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:
 - Quoted prices for similar assets or liabilities in active markets;
 - Quoted prices for identical or similar assets or liabilities in non-active markets;
 - Inputs other than quoted market prices that are observable; and
 - Inputs that are derived principally from or corroborated by observable market data through correlation or other means.
- Level 3 - Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These valuations, whether derived internally or obtained from a third party, use critical assumptions that are not widely available to estimate market participant expectations in valuing the asset or liability.

(4) Fair values are based on quoted market prices when available. When market prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model or input used.

Derivatives are carried at fair value, which is determined using the Company’s derivative accounting system in conjunction with observable key financial data from third-party sources, such as yield curves, exchange rates, S&P 500 Index prices and London Interbank Offered Rates ("LIBOR") and Overnight Index Swap Rates ("OIS"). Effective June 30, 2012, the Company began using OIS curve for discounting the cash flows rather than LIBOR curve for rate derivatives. For those derivatives that are unable to be valued by the accounting system, the Company typically utilizes values established by third-party brokers. Derivatives which qualify for special hedge accounting treatment are reported in a manner that is consistent with the accounting for the hedged asset or liability.

(5) See Note 20A(1-4) for disclosures on derivative assets and liabilities.

NOTES TO FINANCIAL STATEMENTS

21. Other Items

A. Extraordinary Items

In 2009, ING Groep N.V. ("ING Group" or "ING") announced the anticipated separation of its global banking and insurance businesses, including the divestiture of ING U.S., Inc. ("ING US"). On April 11, 2013, ING US announced plans to rebrand in the future as Voya Financial. On May 2, 2013, the common stock of ING US began trading on the New York Stock Exchange under the symbol "VOYA." On May 7, 2013 and May 31, 2013, ING US completed its initial public offering of common stock, including the issuance and sale by ING US of 30,769,230 shares of common stock and the sale by ING Insurance International B.V. ("ING International"), an indirect wholly owned subsidiary of ING Group and previously the sole stockholder of ING US, of 44,201,773 shares of outstanding common stock of ING US (collectively, the "IPO"). On September 30, 2013, ING International transferred all of its shares of ING US common stock to ING Group. The transfer had no impact on ING US's results of operations and comprehensive income for the three and nine months ended September 30, 2013 and 2012 and its changes in shareholders' equity and statements of cash flows for the nine months ended September 30, 2013 and 2012.

On October 29, 2013, ING Group completed a sale of 37,950,000 shares of common stock of ING US in a registered public offering ("secondary offering"), reducing ING Group's ownership of ING US to 57%.

C. Other Disclosures

The financial turmoil in Europe continues to be a dominant investment theme across the global capital markets. While certain aspects of this crisis seem to have stabilized, the possibility of capital markets volatility spreading through a highly integrated and interdependent banking system remains elevated. The Company did not have any investments in sovereign debt of governments of Greece, Italy, Portugal, Spain or Ireland as of September 30, 2013.

G. Subprime Mortgage-Related Risk Exposure

(1) During 2013, market prices and sector liquidity exhibited sustained improvements, driven by an improved technical picture and positive sentiment regarding the potential for fundamental improvements within the sector. In managing the Company's risk exposure to subprime and Alt-A mortgages, the collateral performance and structural characteristics associated with various positions held are taken into account.

The Company does not originate or purchase subprime or Alt-A whole-loan mortgages. The Company does have exposure to RMBS and ABS. Subprime lending is the origination of loans to customers with weaker credit profiles. The Company defines Alt-A Loans to include the following: residential mortgage loans to customers who have strong credit profiles but lack some element(s), such as documentation to substantiate income; residential mortgage loans to borrowers that would otherwise be classified as prime but whose loan structure provides repayment options to the borrower that increase the risk of default; and any securities backed by residential mortgage collateral not clearly identifiable as prime or subprime.

(2) The Company does not have direct exposure through investments in subprime mortgage loans as of September 30, 2013.

(3) The Company's direct exposure through other investments as of September 30, 2013:

	Actual Cost	Book/Adjusted Carrying Value (excluding interest)	Fair Value	Other Than Temporary Impairment Losses Recognized

g. Total	\$ 8,802,159	\$ 9,017,796	\$ 8,658,189	\$ —

(4) The Company did not have underwriting exposure to subprime mortgage risk through Mortgage Guaranty or Financial Guaranty insurance coverage as of September 30, 2013.

22. Events Subsequent

Type I – Recognized Subsequent Events

The Company is not aware of any events occurring subsequent to September 30, 2013 that may have a material effect on the Company's financial statements. The Company evaluated events subsequent to September 30, 2013 through November 13, 2013, the date the statutory financial statements were available to be issued.

Type II – Nonrecognized Subsequent Events

The Company is not aware of any events occurring subsequent to September 30, 2013 that may have a material effect on the Company's financial statements. The Company evaluated events subsequent to September 30, 2013 through November 13, 2013, the date the statutory financial statements were available to be issued.

25. Change in Incurred Losses and Loss Adjustment Expenses

Reserves at December 31, 2012 were \$36,506,799. As of September 30, 2013, \$15,534,838 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$10,699,233 as a result of re-estimation of unpaid claims and claim adjustment expenses principally on group life, accident and health and stop loss lines of insurance. Therefore, there has been a \$10,272,728 favorable prior-year development since December 31, 2012. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims. Included in this decrease, the Company experienced \$0 of favorable prior year loss development on retrospectively rated policies. However, the business to which it relates may be subject to premium adjustments.
