Jayshree's Blog: Next Gen EOS for Cloud-Scale Networking

Arista EOS is the industry's best fit for cloud design, as it supports quality, extensibility, fault-isolation, and high availability. Arista is proud to announce the next generation of EOS, NetDB™, which extends benefits of a state-based system across the entire network. Our commitment to innovation gives Arista a unique role as a pioneer in cloud networking.

Introducing Arista EOS Evolution: NetDB™

Arista Networks (NYSE:ANET) today announced the next phase of Arista EOS (Extensible Operating System), enabling customers to focus on real-time migration from legacy enterprise silos to private, public and hybrid cloud networking. This evolution is based on three powerful building blocks: Infrastructure, Hybrid Cloud and Container Support.
