

Arista Announces Acquisition of Awake Security

AI-driven network detection and response for client to cloud network security

September 28th, 2020

Arista Announces Acquisition of Awake Security

- Arista Networks today announced that it has entered into a definitive agreement to acquire Awake Security.
- Awake Security is a Network Detection and Response (NDR) platform provider that combines artificial intelligence (AI) with human expertise to autonomously hunt and respond to insider and external threats.
- Awake pioneered NDR platforms for real-time AI-driven situational awareness to secure digital assets and then respond to mitigate those risks.
- The transaction is expected to close in Arista's fiscal Q4 FY2020, subject to customary closing conditions, including regulatory approvals. This acquisition is not expected to have a material impact on fiscal 2020 operating results.
