The award leverages the versatility of AEVEX's long range one-way attack platform. Designed for long-range operations and high-payload capacity, the platform provides a flexible, scalable solution capable of supporting evolving mission requirements across diverse operational environments.

capacity, the platform provides a flexible, scalable solution capable of supporting evolving mission requirements across diverse operational environments.

This work builds on AEVEX's broader portfolio of unmanned and mission-support solutions designed to deliver affordable, rapidly fieldable capabilities for Air Force applications. These mission systems emphasize modular, adaptable architectures that enhance readiness, support diverse operational profiles, and help reduce operator workload. AEVEX's integrated engineering and production teams enable scalable delivery and responsiveness to evolving customer needs.

"This award reflects our ongoing work with the U.S. Air Force and our ability to deliver reliable, mission-aligned capabilities at scale," said Roger Wells, Chief Executive Officer at AEVEX. "We remain focused on equipping our

customers with dependable solutions that enhance readiness and operational effectiveness.”

Additional details regarding the scope and platform are not being disclosed. Performance will be executed from AEVEX's existing U.S. engineering and production footprint over the contract period of performance.

The contract is consistent with AEVEX's broader work supporting U.S. Government customers through its vertically integrated engineering teams, rapid prototyping capabilities, and distributed manufacturing infrastructure.
