Logitech Forecasts Continued Robust Growth for Fiscal Year 2019

Company Looks Toward Sixth Consecutive Year of Growth

NEWARK, Calif. — March 5, 2018 and ZURICH, Switzerland, March 6, 2018 — In advance of a meeting to be held with financial analysts and investors in Zurich, Logitech International (SIX:LOGN) (Nasdaq:LOGI) today:

- Announced a Fiscal Year 2019 outlook of high single-digit sales growth in constant currency and \$310 million to \$320 million in non-GAAP operating income, an increase of approximately 15 percent from the midpoint of the Company's profitability outlook for Fiscal Year 2018.
- Reaffirmed its Fiscal Year 2018 outlook of 12 to 14 percent sales growth in constant currency and \$270 million to \$280 million in non-GAAP operating income.

"Fiscal Year 2019 will be our sixth consecutive year of growth," said Bracken Darrell, Logitech president and chief executive officer. "We are progressing toward our vision of Logitech as a multi-category, multi-brand design company. Our design, engineering, marketing, go-to-market and operations capabilities are the engine behind our continued growth - an engine we're investing in for the future."

Logitech's Analyst and Investor Day will be held today at 9:00 a.m. Central European Time. A live webcast and replay of the meeting will be available on the Logitech corporate website at <http://ir.logitech.com>.

Use of Non-GAAP Financial Information and Constant Currency

To facilitate comparisons to Logitech's historical results, Logitech has included non-GAAP adjusted measures, which exclude share-based compensation expense, amortization of intangible assets, purchase accounting effect on inventory, acquisition-related costs, change in fair value of contingent consideration for business acquisition, restructuring charges (credits), gain (loss) on investments in privately held companies, investigation and related expenses, non-GAAP income tax adjustment, and other items detailed under "Supplemental Financial Information" in our quarterly earnings press releases and posted to our website at <http://ir.logitech.com>. Historical GAAP and corresponding non-GAAP

measures are provided with our earnings releases and presentations in the Investors section of our website. Logitech also presents percentage sales growth in constant currency to show performance unaffected by fluctuations in currency exchange rates. Percentage sales growth in constant currency is calculated by translating prior period sales in each local currency at the current period's average exchange rate for that currency and comparing that to current period sales. Logitech believes this information, used together with the GAAP financial information, will help investors to evaluate its current period performance and trends in its business. With respect to the Company's outlook for non-GAAP operating income, most of these excluded amounts pertain to events that have not yet occurred and are not currently possible to estimate with a reasonable degree of accuracy. Therefore, no reconciliation to the GAAP amounts has been provided for Fiscal Years 2018 or 2019.
