

New Logitech Wireless Touchpad Lets You Point, Scroll and Swipe with Ease

Multi-Touch PC Device Makes it Easy to Go Wherever You Want on the Web

FREMONT, Calif.--(BUSINESS WIRE)-- Today Logitech (SIX:LOGN) (NASDAQ:LOGI) unveiled the [Logitech® Wireless Touchpad](#), making it easy to point, scroll and swipe your way to wherever you go on the Web — and beyond.

With multi-touch navigation and intuitive, gesture-based controls, the Logitech® Wireless Touchpad lets you navigate your computer naturally. The large touch surface gives you plenty of room to let your fingertips do the clicking. And since there are no cords, there's no clutter and no hassles. Just put the touchpad anywhere on your desk or tabletop, insert the plug-and-forget Logitech® Unifying receiver into your computer's USB port and let the fun begin. Plus, the receiver stays in your computer and enables you to easily connect up to five other compatible devices.

"The Logitech Wireless Touchpad is perfect for people who want to surf the Web in a more fun and natural way," said Rory Dooley, Logitech's senior vice president and general manager of the Control Devices business unit. "It lets Web surfers flick through websites and effortlessly scan long pages — making browsing easier than ever."

The Logitech® Wireless Touchpad's multi-touch navigation offers up to four-finger gestures and swipes to scroll pages, jump tabs and switch applications. Advanced 2.4 GHz wireless virtually eliminates delays, dropouts and interference. And you can easily stay powered up — with up to four months of battery life and an LED indicator light that tells you when the touchpad is on and your batteries are running low.

Pricing and Availability

The Logitech Wireless Touchpad is expected to be available in the U.S. and Europe beginning in September 2011, for a suggested retail price of \$49.99. For more information please visit our [blog](#) or www.logitech.com.

About Logitech

Logitech is a world leader in products that connect people to the digital experiences they care about. Spanning multiple computing, communication and entertainment platforms, Logitech's combined hardware and software enable or enhance digital navigation, music and video entertainment, gaming, social networking, audio and video communication over the Internet, video security and home-entertainment control. Founded in 1981, Logitech International is a Swiss public company listed on the SIX Swiss Exchange (LOGN) and on the Nasdaq Global Select Market (LOGI).

Logitech, the Logitech logo, and other Logitech marks are registered in Switzerland and other countries. All other trademarks are the property of their respective owners. For more information about Logitech and its products, visit the company's Web site at www.logitech.com.
