"Over the last five years, Logitech has dramatically upgraded its innovation level," said Bracken Darrell, Logitech president and chief executive officer. "We've always had strong engineering, but we've been striving to improve our innovation engine by putting consumers at the center of every step. We aren't there yet. But, when we are, we will no longer be merely a product company. We will be a design company. That's our goal. It's an honor to see our progress recognized by Fast Company, among such an impressive group of companies."

The Fast Company Most Innovative Companies rankings are curated by more than three dozen Fast Company editors, reporters and contributors. While 1,500 companies across the globe applied, Fast Company selected only 10 companies for its Design list.

Fast Company's "Most Innovative Companies" issue (March-April 2018) is now available online at **www.fastcompany.com/MIC**, through the Fast Company app on iTunes, and on newsstands beginning Feb. 27.

Last year, the **Logitech K780 Multi-Device Wireless Keyboard** and **Logitech Pop Smart Button** received Honorable Mentions in the Product Category from the **Innovation By Design Awards** by Fast Company.
