(1) The Company believes that the Non-GAAP financial measure “Adjusted after-tax earnings from continuing operations attributable to FMC stockholders” and its presentation on a per share basis provides useful information about the Company’s operating results to management, investors and securities analysts. Adjusted earnings excludes the effects of corporate special charges, tax-related adjustments and the results of our discontinued operations. The Company also believes that excluding the effects of these items from operating results allows management and investors to compare more easily the financial performance of its underlying business from period to period.

(a) **Three Months Ended September 30, 2019:**

Restructuring and other charges (income) is comprised of charges associated with the continued integration of the DuPont Crop Protection Business. These charges include severance and other costs (benefits) of \$2.6 million. All other charges were \$4.2 million, which includes charges of continuing environmental sites treated as a Corporate charge of \$4.1 million.

Three Months Ended September 30, 2018:

Restructuring and other charges (income) is primarily comprised of charges associated with the integration of the DuPont Crop Protection Business. Restructuring charges were incurred as a continuation of our decision to exit the Ewing R&D center and change to our market access model in India of \$14.9 million and \$1.8 million, respectively. Other restructuring charges as we continue to integrate the acquired DuPont Crop Protection Business totaled to \$3.3 million. There were also other restructuring and other charges (income) totaling \$2.0 million. Additionally, restructuring and other charges (income) includes charges of continuing environmental sites treated as a Corporate charge of \$2.2 million and other Corporate charges of \$1.2 million.

Nine Months Ended September 30, 2019:

Restructuring and other charges (income) is comprised of charges associated with the continued integration of the DuPont Crop Protection Business. These charges include severance, accelerated depreciation on certain fixed assets, and other costs (benefits) of \$13.2 million. Additionally, restructuring and other charges (income) includes charges of continuing environmental sites treated as a Corporate charge of \$12.3 million and other miscellaneous restructuring and other charges totaling \$1.8 million.

Nine Months Ended September 30, 2018:

Restructuring and other charges (income) primarily consists of the total gain on sales of \$87.2 million from the divestments of certain product portfolios as part of our commitment to both the European Commission and Competition Commission of India related to the DuPont Crop Protection Acquisition. Restructuring and other charges (income) also consists of \$27.5 million of charges due to our decision to exit the Ewing R&D and \$57.2 million of charges related to the change in our market access model in India. Other restructuring charges as we continue to integrate the acquired DuPont Crop Protection Business totaled to \$7.8 million. There were other restructuring and other charges (income) of \$8.6 million. Additionally, restructuring and other charges (income) includes charges of continuing environmental sites treated as a Corporate charge of \$8.8 million and other Corporate charges of \$3.7 million.

- (b) Our non-operating pension and postretirement charges (income) are defined as those costs (benefits) related to interest, expected return on plan assets, amortized actuarial gains and losses and the impacts of any plan curtailments or settlements. These are excluded from our Adjusted Earnings and are primarily related to changes in pension plan assets and liabilities which are tied to financial market performance and we consider these costs to be outside our operational performance. We continue to include the service cost and amortization of prior service cost in our Adjusted Earnings results noted above. These elements reflect the current year operating costs to our businesses for the employment benefits provided to active employees.
- (c) Charges related to the expensing of the inventory fair value step-up resulting from the application of purchase accounting as well as legal and professional fees associated with acquisition activities. Amounts represent the following:

(in Millions)	Three Months Ended September 30,		Nine Months Ended September 30,

DuPont Crop Protection Business Acquisition				
Legal and professional fees ⁽¹⁾	\$ 16.0	\$ 16.9	\$ 52.6	\$ 64.7
Inventory fair value amortization ⁽²⁾	—	1.3	—	69.6
Total Transaction-related charges	\$ 16.0	\$ 18.2	\$ 52.6	\$ 134.3

(1) Represents transaction costs, costs for transitional employees, other acquired employees related costs, and transactional-related costs such as legal and professional third-party fees. These charges are recorded as a component of "Selling, general and administrative expense" on the condensed consolidated statements of income (loss).

(2) These charges are included in "Costs of sales and services" on the condensed consolidated statements of income (loss).

- (d) The income tax expense (benefit) on Corporate special charges (income) is determined using the applicable rates in the taxing jurisdictions in which the corporate special charge or income occurred and includes both current and deferred income tax expense (benefit) based on the nature of the non-GAAP performance measure.

(e) Three and Nine Months Ended September 30, 2019 and 2018

Discontinued operations, net of income taxes include, in periods up to its separation on March 1, 2019, the results of FMC Lithium, including separation-related costs, as well as provisions, net of recoveries, for environmental liabilities and legal reserves and expenses related to previously discontinued operations. The three months ended September 30, 2019 has no results of our FMC Lithium segment compared to a full quarter for the three months ended September 30, 2018. During the nine months ended September 30, 2019, we finalized the sale of the first of two parcels of land of our discontinued site in Newark, California. The gain on sale was approximately \$21 million, net of tax. Offsetting the gain on sale were the results of our discontinued FMC Lithium segment, which was a net loss due to separation-related costs. Discontinued operations, net of income taxes for the nine months ended September 30, 2018 includes both a full period of results of FMC Lithium as well as an additional gain on sale of the FMC Health and Nutrition business to DuPont of approximately \$17 million as a result of the adjustment to the final working capital.

- (f) We exclude the GAAP tax provision, including discrete items, from the Non-GAAP measure of income, and include a Non-GAAP tax provision based upon the projected annual Non-GAAP effective tax rate. The GAAP tax provision includes certain discrete tax items including, but are not limited to: income tax expenses or benefits that are not related to continuing operating results in the current year; tax adjustments associated with fluctuations in foreign currency remeasurement of certain foreign operations; certain changes in estimates of tax matters related to prior fiscal years; certain changes in the realizability of deferred tax assets and related interim accounting impacts; and changes in tax law. Management believes excluding these discrete tax items assists investors and securities analysts in understanding the tax provision and the effective tax rate related to continuing operating results thereby providing investors with useful supplemental information about FMC's operational performance.
