FMC Corporation Submits Regulatory Dossier for Rimisoxafen, the Industry's First Dual Mode of Action Herbicide, in Brazil

2026-09-28

Second global filing advances rimisoxafen as a novel weed control solution for Brazil's more than 70 million hectares of corn and soybeans

PHILADELPHIA, Sept. 28, 2026 /PRNewswire/ --

FMC Corporation (NYSE: FMC), a leading global agricultural sciences company, today announced the submission of the regulatory dossier for rimisoxafen to Brazilian regulatory authorities. The filing marks the second global regulatory submission for rimisoxafen, the first and only dual mode of action herbicide, following FMC's submission to the U.S. Environmental Protection Agency in July 2026.

Brazil is among the world's largest soybean and corn markets, with approximately 50 million hectares of soybean and over 20 million hectares of corn in production. Growers are facing mounting pressure from resistant broadleaf weeds, including *Amaranthus hybridus*, which has developed resistance to glyphosate and acetolactate synthase inhibitors, and *Amaranthus palmeri*, a regulated quarantine weed posing a significant and growing threat to crop productivity.

"Brazilian growers are facing complex weed resistance challenges that demand new and differentiated solutions," said Leonardo Bastos, vice president and chief marketing officer at FMC. "Submitting rimisoxafen for regulatory review in Brazil is an important step forward, demonstrating our long-term commitment to this market and to the growers who depend on innovation to protect their crops and their livelihoods."

Classified by the Herbicide Resistance Action Committee under Groups 12 and 32, rimisoxafen offers growers a novel tool to help diversify weed management programs and support long-term resistance management. In

extensive FMC field testing, rimisoxafen has demonstrated consistent activity against small seeded broadleaf weeds and those resistant to other herbicides, including *Amaranthus palmeri* and *Amaranthus hybridus*.

Rimisoxafen is the third novel herbicide active ingredient FMC has advanced to regulatory submission in Brazil, following Isoflex™ active and Dodhylex™ active. Together, these submissions reflect the depth and productivity of FMC's research and development pipeline and the company's commitment to advancing next-generation crop protection solutions through the regulatory process.

Formulated product submissions for rimisoxafen are expected to follow as the regulatory process advances in Brazil. Timing and outcomes remain subject to regulatory review and approval. Rimisoxafen is not registered for sale or use in Brazil or any other country. No offer for sale, sale or use of this product is permitted prior to receipt of all required regulatory approvals.

About FMC

FMC Corporation is a global agricultural sciences company dedicated to helping growers produce food, feed, fiber and fuel for an expanding world population while adapting to a changing environment. FMC's innovative crop protection solutions – including biologicals, crop nutrition, digital and precision agriculture – enable growers and crop advisers to address their toughest challenges economically while protecting the environment. FMC is committed to discovering new herbicide, insecticide and fungicide active ingredients, product formulations and pioneering technologies that are consistently better for the planet. Statement under the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995: FMC and its representatives may from time to time make written or oral statements that are "forward-looking" and provide other than historical information, including statements contained in this press release, in FMC's other filings with the SEC, and in presentations, reports or letters to FMC stockholders.

In some cases, FMC has identified these forward-looking statements by such words or phrases as "outlook", "will likely result," "is confident that," "expect," "expects," "should," "could," "may," "will continue to," "believe," "believes," "anticipates," "predicts," "forecasts," "estimates," "projects," "potential," "intends" or similar expressions identifying "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, including the negative of those words or phrases. Such forward-looking statements are based on our current views

and assumptions regarding future events, future business conditions and the outlook for the company based on currently available information. The forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to be materially different from any results, levels of activity, performance or achievements expressed or implied by any forward-looking statement. These statements are qualified by reference to the risk factors included in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2025 (the "2025 Form 10-K"), the section captioned "Forward-Looking Information" in Part II of the 2025 Form 10-K and to similar risk factors and cautionary statements in all other reports and forms filed with the Securities and Exchange Commission ("SEC"). We wish to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Forward-looking statements are qualified in their entirety by the above cautionary statement.

We specifically decline to undertake any obligation, and specifically disclaims any duty, to publicly update or revise any forward-looking statements that have been made to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events, except as may be required by law.
