

## NEWS RELEASE

# FMC Corporation submits regulatory applications in eight countries for Dodhylex™ active

8/20/2024

This first new mode of action herbicide in over 30 years will be an important tool for managing resistance

PHILADELPHIA, Aug. 20, 2024 /PRNewswire/ -- FMC Corporation (NYSE: FMC), a leading agricultural sciences company, recently submitted regulatory applications for Dodhylex™ active herbicide in eight rice-growing countries. Registration dossiers were submitted in India, Brazil, the Philippines, the United States, Colombia, South Korea, Peru and Taiwan, which account for approximately 35% of the estimated 165 million hectares of planted rice globally. Regulatory submissions for Dodhylex™ active are planned in additional key global markets.

Dodhylex™ active, FMC's brand name for tetflupyrolimet, has been classified by the Herbicide Resistance Action Committee (HRAC) and the Weed Science Society of America (WSSA) as a Group 28 herbicide, making it the first new mode of action herbicide globally in over three decades. Dodhylex™ active will be an important new rotational tool for growers to manage herbicide resistance, which poses an increasing challenge for growers worldwide.

"Dodhylex™ active is a significant advancement for the agriculture industry as it will help combat resistant grass weeds," said Dr. Seva Rostovtsev, FMC executive vice president and chief technology officer. "This is particularly remarkable because rice is a grass, and controlling grass weeds in a grass crop is challenging."

Studies show this proprietary molecule will offer season-long control of resistant grass weeds in rice, regardless of the cultivation method. FMC continues to research the use of Dodhylex™ active in additional crops, including sugarcane, wheat, soybean and corn.

"Dodhylex™ active is one of many new active ingredients in our robust development pipeline that will contribute to FMC's near and long-term growth," said Brian P. Angeli, FMC executive vice president and chief marketing officer.

"There are opportunities to control resistant grass weeds in other crops, and we are exploring additional markets for Dodhylex™ active outside of rice. We believe this will expand our global addressable market in the future."

Dodhylex™ active, which was discovered and developed at FMC's Stine Research Center, is a testament to FMC's commitment to innovation and disciplined approach to advancing new molecules to help combat resistance and support food security for a growing population. Pending regulatory decisions, FMC anticipates the first launches of Dodhylex™ active in 2026.

Dodhylex is a trademark of FMC Corporation and/or an affiliate. Always read and follow all label directions, restrictions and precautions for use. Dodhylex™ active is not registered for sale or use in any country. No offer for sale, sale, or use of this product is permitted prior to the issuance of the required registrations by the relevant regulatory entity.

Statement under the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995: FMC and its representatives may from time to time make written or oral statements that are "forward-looking" and provide other than historical information, including statements contained in this press release, in FMC's other filings with the SEC, and in presentations, reports or letters to FMC stockholders.

In some cases, FMC has identified these forward-looking statements by such words or phrases as "outlook", "will likely result," "is confident that," "expect," "expects," "should," "could," "may," "will continue to," "believe," "believes," "anticipates," "predicts," "forecasts," "estimates," "projects," "potential," "intends" or similar expressions identifying "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, including the negative of those words or phrases. Such forward-looking statements are based on our current views and assumptions regarding future events, future business conditions and the outlook for the company based on

currently available information. The forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to be materially different from any results, levels of activity, performance or achievements expressed or implied by any forward-looking statement. These statements are qualified by reference to the risk factors included in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2023 (the "2023 Form 10-K"), the section captioned "Forward-Looking Information" in Part II of the 2023 Form 10-K and to similar risk factors and cautionary statements in all other reports and forms filed with the Securities and Exchange Commission ("SEC"). We wish to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Forward-looking statements are qualified in their entirety by the above cautionary statement.

We specifically decline to undertake any obligation, and specifically disclaims any duty, to publicly update or revise any forward-looking statements that have been made to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events, except as may be required by law.
