Further, WestRock's businesses are subject to a number of general risks that would affect any such forward-looking statements including, among others, decreases in demand for their products; increases in energy, raw materials, shipping and capital equipment costs; reduced supply of raw materials; fluctuations in selling prices and volumes; intense competition; the potential loss of certain customers; the scope, costs, timing and impact of any restructuring of our operations and corporate and tax structure; the occurrence of a natural disaster, such as a hurricane, winter or tropical storm, earthquake, tornado, flood, fire, or other unanticipated problems such as labor difficulties, equipment failure or unscheduled maintenance and repair, which could result in operational disruptions of varied duration; our desire or ability to continue to repurchase company stock; and adverse changes in general market and industry conditions. Such risks and other factors that may impact management's assumptions are more particularly described in our filings with the Securities and Exchange Commission, including in Item 1A under the caption "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. ¹⁾ See Use of Non-GAAP Financial Measures and Reconciliation in the Appendix.

Free Cash Flow is defined as Cash Provided by Operating Activities, excluding after-tax cash restructuring costs minus capital expenditures.

This is a non-GAAP Measure. Calculated as annual dividend of \$1.50 divided by closing share price on 1/27/2016 of \$32.60.

Appendix

Non-GAAP Measures

Credit Agreement EBITDA:

"Credit Agreement EBITDA" is calculated in accordance with the definition contained in our Credit Agreement. Credit Agreement EBITDA is generally defined as Consolidated Net Income plus: consolidated interest expense, income taxes of the consolidated companies determined in accordance with GAAP, depreciation and amortization expense of the consolidated companies determined in accordance with GAAP, loss on extinguishment of debt and financing fees, certain non-cash and cash charges incurred, including goodwill impairment, certain restructuring and other costs, merger / acquisition and integration costs, charges and expenses associated with the write-up of inventory acquired and other items.

Total Funded Debt and Leverage Ratio

"Total Funded Debt" is calculated in accordance with the definition contained in our Credit Agreement. Total Funded Debt is generally defined as aggregate debt obligations reflected in our balance sheet less the stepped up value of said debt, less non-recourse debt except for Securitization related debt, less trade payables related debt that may be recharacterized as debt, less insurance policy loans to the extent offset by assets of the applicable insurance policies, obligations with the hedge adjustments resulting from terminated and existing fair value interest rate derivatives or swaps, if any, less certain cash, plus additional outstanding letters of credit not already reflected in debt and certain guarantees.

Our management uses Credit Agreement EBITDA and Total Funded Debt to evaluate compliance with our debt covenants and borrowing capacity available under our Credit Agreement and as a measure of operating performance. Management believes that investors also use these measures to evaluate our compliance with our debt covenants and available borrowing capacity. Borrowing capacity is dependent upon, in addition to other measures, the "Credit Agreement Debt/EBITDA ratio" or the "Leverage Ratio," which is defined as Total Funded Debt divided by Credit Agreement EBITDA. As of the December 31, 2015 calculation, our Leverage Ratio was 2.20 times. While the Leverage Ratio under the Credit Agreement determines the credit spread on our debt we are not subject to a Leverage Ratio cap. The Credit Agreement is subject to a Debt to Capitalization and Consolidated Interest Coverage Ratio, as defined in the Credit Agreement. Our management uses Credit Agreement EBITDA and Total Funded Debt to evaluate our performance and to compare to our target Leverage Ratio of 2.25x – 2.50x.

Non-GAAP Measures (cont.)

Adjusted Earnings Per Diluted Share

We also use the non-GAAP measure "adjusted earnings per diluted share," also referred to as "adjusted earnings per share" or "Adjusted EPS." Management believes this non-GAAP financial measure provides our board of directors, investors, potential investors, securities analysts and others with useful information to evaluate our performance because it excludes restructuring and other costs, net, and other specific items that management believes are not indicative of the ongoing operating results of the business. The Company and our board of directors use this information to evaluate our performance relative to other periods.

Constant Currency Measures

Our management uses Segment Sales, Segment Income and Segment EBITDA Margins as well as those measures held on a constant currency basis, i.e. eliminating the impact of the change in currency from the comparison period, to evaluate our segment performance and our performance against our peers. Management believes that investors also use this measure to evaluate our performance relative to our peers. "Segment EBITDA Margin" is calculated by dividing that segment's EBITDA by Segment Sales (in millions, except percentages).
