NEWS RELEASE

Omeros Corporation to Announce Second Quarter Financial Results on Morning of August 9, 2023

2023-08-04

SEATTLE--(BUSINESS WIRE)--Aug. 4, 2023-- Omeros Corporation (NASDAQ: OMER), today announced that the company will issue its financial results for the quarter ended June 30, 2023, on Wednesday, August 9, 2023, before the market opens. Omeros management will host a conference call and webcast that same day at 8:30 a.m. Eastern Time (5:30 a.m. Pacific Time) to discuss the financial results as well as recent developments and highlights.

Conference Call Details

For online access to the live webcast of the conference call, go to Omeros' website at **https://investor.omeros.com/upcoming-events**.

To access the live conference call via phone, participants must register at **this link** to receive a unique PIN. Once registered, you will have two options: (1) Dial in to the conference line provided at the registration site using the PIN provided to you, or (2) choose the "Call Me" option, which will instantly dial the phone number you provide. Should you lose your PIN or registration confirmation email, simply re-register to receive a new PIN.

A replay of the call will be made accessible online at **https://investor.omeros.com/archived-events**.

About Omeros Corporation

Omeros is an innovative biopharmaceutical company committed to discovering, developing and commercializing small-molecule and protein therapeutics for large-market and orphan indications targeting immunologic disorders including complement-mediated diseases, cancers, and addictive and compulsive disorders. Omeros' lead MASP-2 inhibitor narsoplimab targets the lectin pathway of complement and is the subject of a biologics license application pending before FDA for the treatment of hematopoietic stem cell transplant-associated thrombotic microangiopathy (TA-TMA). Narsoplimab is also in multiple late-stage clinical development programs focused on other complement-mediated disorders, including IgA nephropathy, COVID-19, and atypical hemolytic uremic syndrome. Omeros' long-acting MASP-2 inhibitor OMS1029 is currently in a Phase 1 clinical trial. OMS906, Omeros' inhibitor of MASP-3, the key activator of the alternative pathway of complement, is advancing across multiple clinical programs for alternative pathway-related diseases, including paroxysmal nocturnal hemoglobinuria (PNH) and complement 3 (C3) glomerulopathy. For more information about Omeros and its programs, visit **www.omeros.com**.
