NEWS RELEASE

Omeros Corporation to Announce Third Quarter Financial Results on November 16, 2026

2026-11-10

SEATTLE--(BUSINESS WIRE)-- Omeros Corporation (NASDAQ: OMER) today announced that it will issue its financial results for the third quarter of 2026 on Monday, November 16, 2026 after market close. Omeros management will host a conference call and webcast that same day at 4:30 p.m. Eastern Time (1:30 p.m. Pacific Time) to discuss recent developments and highlights as well as the Company's financial results.

Conference Call Details and Webcast Link Instructions

To access the live webcast, please click **here** or visit the "**Upcoming Events**" section of the Investor Relations page of Omeros' website.

A replay of the call will be available for 90 days in the "**Archived Events**" section of the Investor Relations page of Omeros' website.

As Omeros continues to transition to a new earnings call platform (hosted by Q4 Inc.), please allow extra time to log in prior to the start of the call.

About Omeros Corporation

Omeros is an innovative biotechnology company that discovers, develops, and commercializes first-in-class protein and small-molecule therapeutics for both large-market and orphan indications, with a focus on the treatment of complement-mediated diseases, cancers, and addictive or compulsive disorders. Omeros' lead complement inhibitor YARTEMLEA® (narsoplimab-wuug), which targets the lectin pathway's effector enzyme MASP-2, is FDA-approved and commercially available in the U.S. for the treatment of hematopoietic stem cell transplant-associated thrombotic microangiopathy (TA-TMA) in adult and pediatric patients two years of age and older. OMS1029, Omeros' long-acting MASP-2 inhibitor, has successfully completed Phase 1 clinical trials.

Under an asset purchase and licensing agreement, Novo Nordisk acquired global rights to zaltenibart (formerly OMS906), an inhibitor of MASP-3, the alternative pathway's key activator, which is in clinical development for PNH and other alternative pathway indications, along with associated intellectual property and related assets. Omeros' pipeline also includes OMS527, a phosphodiesterase 7 inhibitor in clinical development for cocaine use disorder, which is fully funded by the National Institute on Drug Abuse, and a growing portfolio of novel recombinant antibodies targeting multidrug-resistant organisms and novel molecular and cellular therapeutic programs for oncology.
