NEWS RELEASE

Omeros' New GPR174 Immuno-oncology Data Presented at the American Association for Cancer Research Conference In Boston Now Available Online

2019-11-20

SEATTLE--(BUSINESS WIRE)--Nov. 20, 2019-- Omeros Corporation (Nasdaq: OMER) presented new GPR174 immuno-oncology data yesterday at the American Association for Cancer Research Conference on Tumor Immunology and Immunotherapy in Boston, Massachusetts. The positively received and well-attended presentation about the company's cell-based and animal studies related to its newly discovered cancer immunity axis was made by Marc Gavin, Ph.D., Omeros' Director of Immunology. These data can now be accessed on the company's website at **https://investor.omeros.com/presentations**

About Omeros Corporation

Omeros is an innovative biopharmaceutical company committed to discovering, developing and commercializing small-molecule and protein therapeutics for large-market as well as orphan indications targeting complement-mediated diseases, disorders of the central nervous system and immune-related diseases, including cancers. In addition to its commercial product **OMIDRIA® (phenylephrine and ketorolac intraocular solution) 1%/0.3%**, Omeros has multiple Phase 3 and Phase 2 clinical-stage development programs focused on complement-mediated disorders and substance abuse, as well as a diverse group of preclinical programs including GPR174, a novel target in immuno-oncology that modulates a new cancer immunity axis recently discovered by Omeros. Small-molecule

inhibitors of GPR174 are part of Omeros' proprietary G protein-coupled receptor (GPCR) platform through which it controls 54 new GPCR drug targets and their corresponding compounds. The company also exclusively possesses a novel antibody-generating platform.
