CLEANSPARK

NEWS RELEASE

CleanSpark to Speak at 6th Annual CannaGrow Expo on October 28, 2017

2017-08-23

CleanSpark also the sole vendor invited to present at Inaugural Tenant-Landlord Sustainability Summit

SALT LAKE CITY, Aug. 23, 2017 /PRNewswire/ -- CleanSpark, Inc. (OTC: CLSK), a microgrid company that is combining a patented "stratified" downdraft gasifier along with advanced engineering, software and controls for innovative distributed energy resource management systems, today announced that Adam Maher, Senior Vice President of CleanSpark, Inc. will present at the 6th Annual CannaGrow Expo at 1 p.m. MT on October 28, 2017.

Mr. Maher will be discussing advanced energy and control solutions and how those solutions may be applied to the cannabis growing market in a session titled "Own Your Energy: The Power of Building Your Own Private Micro Grid."

"Microgrids represent the ideal solution for combining controlled distribution agriculture to America's electrical grid," commented Mr. Maher. "A typical indoor grow room has the same power density as a data center, and by some accounts the industry accounts for as much as a third of the electricity used by all U.S. data centers combined. The alternative generation and advanced controls of a microgrid are essential to help these operations avoid interruptions and operate on clean power. I look forward to discussing our state-of-the-art solutions to address the rapidly growing energy needs of this evolving industry."

The CannaGrow Expo is being held October 28-29, 2017 at the Crowne Plaza Denver Airport Hotel & Convention Center in Denver, Colo. For additional information regarding the expo, visit **cannagrowexpo.com** or contact **concierge@CannaGrowExpo.com**.

In addition, Mr. Maher and Bryan Huber, CleanSpark's Chief Operations Officer, presented at the Inaugural Tenant-Landlord Sustainability Summit on August 16-17, in Santa Monica, California. Mr. Huber presented on the development of the national utility grid and the inherent lack of sustainability therein, while Mr. Maher highlighted

the six-year payback on a micro grid for a 14-acre, 2,500-person corporate campus and the advanced micro grid needed to increase sustainability and resiliency. Brands in attendance included Lush Cosmetics, Victoria's Secret, Bath & Body Works, Pink, La Senza, Kay Jewelers, Henri Bendel, Gap, Vans, Lee, Jansport, Nautica, Northface, Timberland, Wrangler, Vans, Zales and Aritzia and Apple.

About CannaGrow Expo

CannaGrow Expo is a two-day educational expo dedicated to the art and science of growing cannabis. The CannaGrow Expo is open to all, 18+, and is intended for cannabis growers, grow managers, dispensary owners, and grow enthusiasts to explore the latest cannabis cultivation technology, tools, and techniques. CannaGrow Denver will feature a selection of 25 cultivation-focused educational sessions lead by world-class growers over two action-packed days, endless networking with cultivators from around the globe, and an expo hall packed with the latest tools & technology for growing cannabis.

About CleanSpark, Inc.

CleanSpark provides advanced energy software and control technology that enables a plug-and-play enterprise solution to modern energy challenges. Our services consist of intelligent solar monitoring solutions, microgrid design and engineering, project development consulting services, system installation and consulting, and turn-key microgrid implementation services. We also combine our microgrid services with its revolutionary and patented stratified downdraft gasifier. The gasifier was developed with partners such as Petersen, Inc., ICON Renewables, Combustion Resources and others to create a logical solution for profitably handling MSW, Coal, Plastics, Municipal Sewage and many other feedstocks. All with ZERO airborne emissions. We've aligned ourselves with research universities such as Utah State University, The University of Utah, and BYU to certify and maximize the efficiencies and production of our technology. By integrating new and existing energy generation and storage assets with advanced load management capacities, CleanSpark's software allows energy generated locally to be shared with other interconnected microgrids. This unique capability enables microgrids to be scaled and widely adopted for commercial, industrial, military, municipal, and remote community deployment.
